# WHO BUY SEEDS.

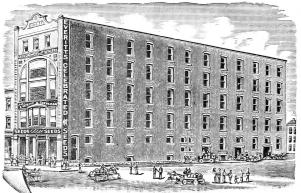

Where the crowds congregate there must be some attraction. Where the orders go there must be some inducements offered. Our whole business is planned on the basis of giving our customers all we can in quantity and quality for their money. Most business houses plan on the opposite basis; that is, give as little as possible for the money. Examine this catalogue, compare it with any other you may have at hand and see if it is not gotten up with your interests in view.

To our old friends and patrons we return thanks. May they ever prosper as those people do

who plant O.K. Seeds. To the old customers of our house, and the new people who we hope to

count as customers, we again send greetings.

We don't devote one-half of our space to telling you how good O.K. SEEDS are. They must be good or we would not have the business we enjoy. Fact is, there are none better.

Mammoth Seed House erected 1892, owned by us and used exclusively by us in handling O.K. Seeds and Man-Weight Tools.

OUR PRICES speak for themselves. They are based on A No. 1 First Quality Seeds. Nothing else ever enters our house. You may pay double our prices elsewhere but we defy you to get better seeds anywhere. Commission Seeds and odds and ends of seeds not commissioned, kept in country stores, cost more than O.K. Seeds and are not to be compared for a moment As we have quoted everything at the lowest mark, we reserve the right to advance prices if conditions require us to do so.

FREE BY MAIL We deliver all our goods free by mail in 4-lb. lots or less, also pints and quarts of beans, peas and corn, at prices quoted, unless stated to the contrary. Keep this in mind when comparing prices. When seeds are sent by freight or express the purchaser invariably pays the transportation charges.

WARRANTY We warrant all our seeds to be O.K. or all right, and that they We warrant all our seeds to be will grow with proper treatment, and be as represented, in so far that if they prove otherwise, we will refill the order or return the money. We exercise the greatest care to have all seeds pure,

true and reliable, yet so many contingencies arise over which we have no control that we can not warrant the crop. If not accepted on these terms they must be returned at once.

**OUR TERMS** are cash with order. We will occasionally send goods C. O. D. if enough is remitted to guarantee charges. It is a useless expense for customers to return money for C.O.D. shipments. HOW TO REMIT a Registered Letter. This is one of the best and most convenient ways to remit, and the sender gets a receipt for the letter as soon as it reaches its destination. Every postmaster must register letters. Money Order, Bank Draft on New York, or Express. Stamps taken same as money in small amounts-1-cent preferred.

REDUCED FREIGHT Through our efforts the railroad companies have made a lower rate on Seed Corn, Oats, Wheat, etc., going to farmers. After January 1st, we can ship such seeds from Indianapolis for just one half the former rate. This is an item for you to consider in placing your order.

PRE-PAY STATIONS. If there is no agent at your station, remit extra for the freight.

GIVE FULL ADDRESS every time you write.

WE FILL ALL ORDERS IMMEDIATELY. Hence if you don't get your seeds in a reasonable time you better repeat your order and be sure to give the same post-office as first given.

**TESTIMONIALS.** We could fill this catalogue with reports from pleased customers for O.K. Seeds. We print below a few from our home gardeners, showing in what esteem they are held here. We do not give complete address with testimonials for Corn, Oats and Potatoes, as by this plan we would be selling any surplus they might have to our loss, and we could not pay our expenses:

J. A. Everitt—Dear Sir—Your seeds are second to none. I make specialties of Louisville Drumhead and Late Flat Dutch Cabbage. I frequently met with failures before I used your seed; since using O.K. Seeds never a failure. You can depend on all my trade in the future. Your seeds are sure to grow, are always true to name, and you certainly deserve the immense trade you enjoy.

PAUL KRAFT, Indianapolis, Ind.

J. A Everitt—Dear Sir—I have used your seeds for several years, and am pleased to say they give me better results than those obtained from any other house. Their germinating qualities are the best, and they always produce crops true to name, thus demonstrating in results the great care you exercise in conducting your large and complicated seed business. JOHN H. STORZ, Indianapolis, Ind.

J. A. Everitt—Dear Sir—I can not recommend your seeds too highly, for I have used them long enough to know what I am writing about. Since I used your seeds I have had no trouble to get a stand, and the crops always come as we expect them. If you can use this letter to induce others to buy seeds of you, you are welcome to do so, as I know they can be depended upon.

HERMAN STEINACKER, Indianapolis, Ind.

J. A. Everitt—Dear Sir—Your seeds have given the utmost satisfaction; quite in contrast with those obtained from some other houses. Since I used your seeds I have no trouble about getting them to grow, and the products are the finest that go to this market. I make specialties of onions, and I can not recommend your onion seed too highly.

CHAS. NUNN, Indianapolis, Ind.

PLEASE HANG THIS CATALOGUE UP for future reference. A calendar is on the back.

Great Beans

PKT. of Each ONLY 30c. Worth 45c.

#### DAVIS KIDNEY WAX.

Every Seedsman, every Canner, every Gardener, in short every person who has tested this bean, concedes that it is a great ways in advance of any other bean of the kind ever offered. It is absolutely rust-proof, and so productive that a field viewed from a distance shows more vellow from the pods than green from the leaves. The plants are a comground. Pods are always full of large, plump, white beans; never a blank. Pods are larger and handsomer, flavor finer and yield greater than any other Kidney Wax Beans in cultivation. Early as Golden Wax. For canners this bean fills a long felt want. Its pearl white beans, combined with other qualities mentioned, makes it entirely without a peer. In a test of all the principal wax beaus, Davis Kidney yielded 1/2 more than any other. Pkt. 10c, pt. 50c, qt. \$1.00, by mail.

-----

"It is the long-looked-for bean, combining hardiness and productiveness with fine quality. A strong growing bush variety of remarkable vigor and freedom from rust. It sends out short tendrils on which pods are formed in addition to those near the central stalk of the plant, which accounts for its wonderful productiveness, amounting under favorable conditions to 100 to 150 fold. The pods are meaty and well filled, thick, flat when young, and semi-round later, of rich yellow color, fine quality, and entirely stringless even when large enough to shell. If the pods are picked as fast as formed, the plant continues to furnish a bountiful supply for an anusual long season." Pkt. 10c, pt. 40c, qt. 75c, by mail.

offered First Time.

Great Western as most productive grower had 64 kinds of beans planted the pastiseason, and this was the kinds of beans planted the pastseason, and this was une best field bean of the entire lot. They are much superior to any other-bean of the marrow family. Unusually early, productive, and the handsomest bean of all, being large, round, ivory white. When other kinds fall down and spoil in a wet season, these stand up on a strong stalk. Resists rust and mildew. Will stand in the field after maturity longer than any other and not waste. The Great Western grows the heaviest top of all, with a root in propartion: the root going into the soil as The Great Western grows the heaviest top of all, with a root in proportion; the root going into the soil as deep as the top extends above, thus enabling it to withstand drought, and fits this variety particularly well for our Western country. The pods hang in clusters all over the top (see the illustration. This stalk was photographed suspended by the root). Also, notice the pods contain from 7 to 9 beans each, denoting a remarkable productive sort. This bean yielded in a test at the rate of 450 bushels per acre. They are the grandest bean of al., and surprise and please every grower.

PRICE-Pkt. 10c, pt. 35c, qt. 60c, peck \$2.00. 

We will send I quart each of 3 great field beans, Great Western, Wisconsin Tree and White Wonder, by mail for \$1.20, or by freight or express for 75c.

# Everitt's Alpha POLE BEAN.

The Earliest Pole Bean in Existence.
Can be grown as far North as Bush
Beans. Introduced in 1896.

It is with no small degree of satisfaction that we offer this new bean to our customers. Each seedsman aspires to be the first in offering new things, and the great competition to secure really valuable vegetables oftentimes runs the price up to high altitudes. We never let price prevent us from securing a really good article, and we paid for the stock of this bean, about 2 bushels, \$75. Our experience with it the season just past proves that our investment was a wise

one. We have several splendid varieties of green We have several splendid varieties of green pod pole beans, but none of them approach Everitt's Alpha in earliness by more than two weeks. This bean is so early that it can be grown in the far north, wherever bush beans succeed, while for any section they are unsurpassed in productiveness by any pole bean, whether grown on poles or with corn. The vines produce nearly all pods and very few leaves. On this account they may be planted close together, about 2x3 feet. Also are better suited to grow in corn, not pulling the stalks down like the beans withheavy foliage. The vines keep in bearing a long time. Quality is in all respects equal to the well known Kentucky wonder. The color of the seed is bright yellow, which is different from any other pole bean, thus proclaiming them a distinct sort. They have never been known to rust or blight. Pods long, round, thick, stringless.

The beans that are enjoyed the most are usually the ones that come first. This is the bean to grow. Also, the bean that brings the most money is the earliest. Here we have it again.

As soon as the merits of this bean are known it will be grown as generally as the now famous Kentucky Wonder.

Price—Pkt. 10c, pint 40c, quart 60c, 4 quarts \$2.00, delivered to any address.

#### ICEBERG LETTUCE.

Quick Growing, Hard, Handsome Heads, Exquisite in Flavor.

There is no handsomer or more solid Cabbage
Lettuce in cultivation—it is strikingly
beautiful. The large, curly leaves which cover the outside of the solid heads are a bright, light green, with very
slight reddish tinge at the edges; they have small indents,
which are constantly filled with dewdrops. They are thus
kept fresh, and show a remarkably crystalline appearance,
which well warrants the name of Iceberg.

Whether in the early spring or the hottest days of summer, the quality is perfect. We confidently commend the New Iccberg Lettuce as surpassingly fine for the home garden and equally valuable for market; its beautiful appearance insures quick sales. Pkt. 10c, oz. 20c, // 1b 50c.

EVANS' TRIUMPH CELERY For solidity, crispness and surpassed. Grows medium size, color creamy white. Besides all the good qualities enumerated, there is one still

greater, namely, its keeping qualities. It can be kept late in the spring to Aprl and May. It is also very economical, as every particle can be eaten. For market gardeners' late use the "Triumph" always brings them out triumphant. Pkt. 10c, oz. 30c.

Read what a few growers have to say about this cabbage:

MR. R. M. EDGECOMB. Mapleton, Mich .: "I have just (April 15) taken out a wagon load of your Hard Heading almost as green as when buried."

MR. JONAS C. SCHOOB, of Cumberland, Pa.: "I put out fifty plants, and forty-nine made the heaviest heads I ever saw for the size, and all so uniform!

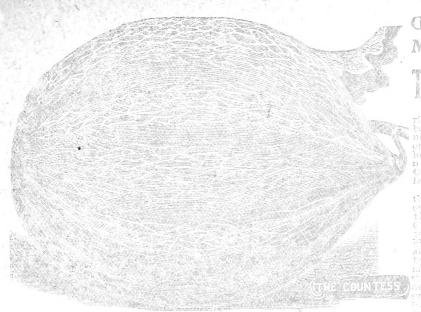

"I have tried all the fa-A market gardener writes: a market gardener writes: "I have tried all the favorite kinds of cabbage, but found no other half so good a keeper, it being in good market condition as late as the 15th of May, which is a fortnight after all cabbage have played out. It also differs from all other kinds in have played out. It also differs from all other kinds in making heads as hard as a rock; standing late frosts in the field better than any other sort, it is especially adapted for late autumn, winter and spring sales."

Pkt. 10c, oz. 25c, 1/4 lb. 75c, lb. \$2.50.

### CLIMBING JAPANESE

This great novelty was introduced from Japan into Europe, where it created a great sensation and was the reigning novelty, and met with a phenomenal sale. From Europe it crossed over to this country, where they are also having an enormous sale. Everyone's attention is attracted to this cucumber upon seeing it climbing gracefully wire screens or other supports and load ed from top to bottom with beautiful, long, smooth fruit. The vines are healthy, vigorous growth, with rich, dark green foliage, and throw out strong, grasping tendrils. which enable it to climb trellis, wire netting, brush, or any other suitable support. It clings 20 tightly that it is not prostrated by heavy storms of wind or rain. It comes into bearing quickly and continues to set the fruits abundantly throughout the season, while the climbing habit of growth enables the hanging fruit to grow perfectly straight; of large size, from twelve to six-teen inches in length. The cucumbers are thick, exceedteen inches in length. The cucumpers are times, cascedingly tender, and of delicate flavor; of cylindrical shape, flesh pure white, skin dark green turning to brown and netted, when ripe. They are of excellent quality for slicing, and when young make attractive pickles.

With this variety of cucumbers the product of a given area of ground can be increased three-fold, thus making them particularly valuable in small gardens or to grow on high priced land. The vines continue bearing ungrow on high priced land. The vines continue bearing until late in the fall. Pkt. Sc, 3 for 20c, oz. 20c.

Grand New Musk Melon,

TIC COUNTESS

A very distinct new

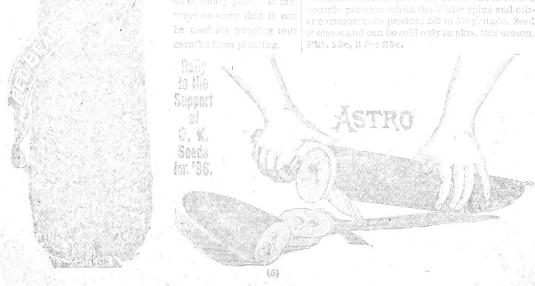

offered in the various cara-logues this season. This new Melon, "THE COUNTESS," again leads all up to date, '96. A distinctive feature is the slight neck on the stem end, which however is not the least objectionable. the least objectionable. Crow to irree size, nearly round, square or blunt at blosson and measuring atom 12 inches in length by 8 inches in diameter and one very uniform in size, Deeply ribbed, heavy nested on the ridges but smooth in the furrows between the ridges. In outside of the uniform, while he will be accommentation.

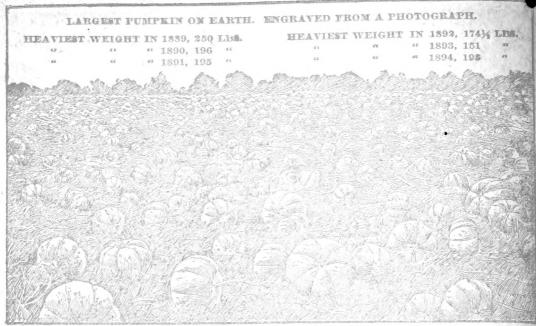

newd experience it is to the properties of the ridges being of a light green and yellow beneath the metting, while between the ridges the color seems like bright, transparent golden smallght. The first is deep, measuring 1% inches thicken and inche meion. Deep, rich standen in color, fine grained, sugary and riching; entirely evoid of any strong roley flavor for a found in red firsted meions, and jet it has a richness and lusciousness of favor exceedingly police in.

WE HIGHLY RECOMMEND THE COUNTESS AND PREDICT THAT WHEREVER USED IT WILL GIVE HIGHEST SATISFACTION, AND WHERE PLACED ON SALE IT WILL TAKE THE LEAD. PRET, 10c. 5 acr 25 5 OZ. 26c. 18 https://doi.org/10.1001/1

sweetness, tenderness, great depth of grain, and

#### The Great Prize Pumpkin, KING of THE MAMMOTHS.

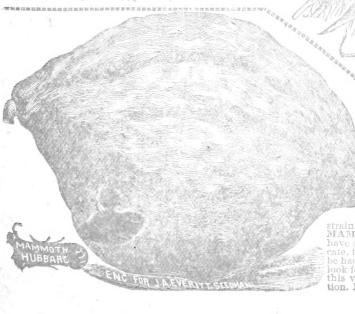

Truly a colossal variety. No other pumpkin ever reached such enormous weights, and any person can grow them of mammoth size by planting on rich ground. If planted on any good land they are wonderfully productive as a field crop. Grow the King of Mammoths and you will be sure of the prize at your fair, besides having one of the best table or pie pumpkins ever grown and a grand keeper. Pkt. 10c, 3 for 25c, oz. 20c, 10. 40c, 1b. 81.00.

#### NEW RADISH.

## Market Gardeners' Ideal Long Scarlet.

HIS is not a new radish, strictly speaking, although many seeds men would pass it off as such. It is an improved strain of the old reliable Long Scarlet Short Top. It is a week earlier than the old strain, has a shorter and more compact top: remains in good condition longer. In shape, is shorter and thicker, which is an advantage if not possible to market at once when pulled. The upper portion is deep scarlet red shading off to white at the tips, altogether making a radish of the most becutiful form and color. Pkt. 5c, oz. 10c, 14 lb. 20c, lb. \$1.00.

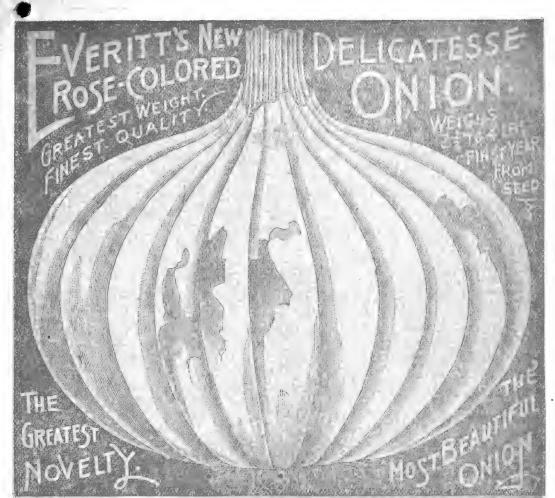

GLASS RADISH-Long, light pink color, flesh transparent white, hence called Glass Radish. Always crisp and brittle. Pkt. 5c, oz. 10c, ½ lb. 25, lb. 85.

## New Mammoth Hubbard Squash:

HIS new strain of Hubbard Squash surpasses the old in size, while not losing any of the fine table qualities that have made the original Hubbard the most popular squash eyer known in the country. Our aim has been to inincrease the size as well as to improve the quality in this new Our customers who grow the OTH HUBBARD will see that we

sopular squash eyer known in the country. Our aim has been to inincrease the size as well as to improve the quality in this new strain. Our customers who grow the MAMMOTH HUBBARD will see that we have succeeded. The flesh is the most delicate, fine grained and sweetest of all. Can be had in use from September till May. We look for a large demand for seed, knowing this variety fully merits extensive cultivation. Pkt. 10c, oz. 20c, 11b. 50c, 1b. \$1.50

# The Most Beautiful onions.

THE LARGEST, FINEST, BEST, MOST PRODUCTIVE.

Now Offered for the First Time .

This grand variety can not be praised too highly. In some respects, it is different from and superior to any other onion now in cultivation. In handsome appearance it is quite distinct, having a rosy skin quite peculiar to itself, and is a novel and striking feature. The flesh is pure white and delicately mild. As a variety to serve uncooked it has not a peer; shape flat, round as shown. Bulbs often weigh from

#### 2 1-2 to 4 Pounds the First Year from Seeds

and will yield enormous crops.

It means comfort

in the Winter to Plant O. K. Seeds in the Spring.

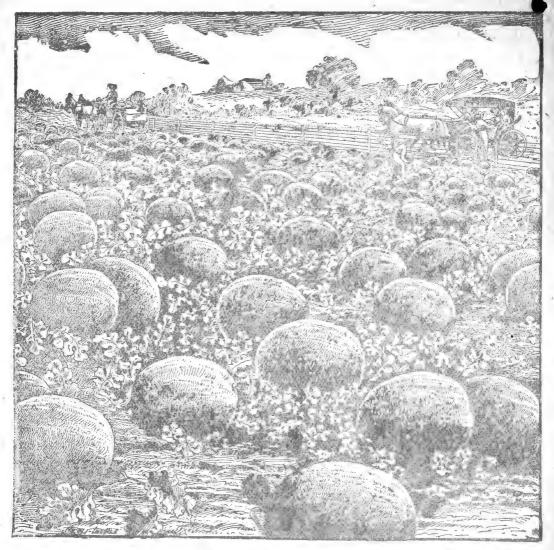

This onion is the greatest novelty of the season in its line, and every one desiring the most beautiful onion, as well as the largest and best, will be satisfied with

## Everitt's Rose-Colored Delicatesse

To get the largest bulbs, sow seed early and thus afford a long season to grow in. We control this novelty exclusively.

Price Seed is for sale only in small quantities. Pkt. 15c, 2 for 25c, 5 for 50c, oz. 50c.

#### GREAT NEW

EACH ONE A GEM-THE 3 A GRAND COMBINATION.

#### Indiana Sweet-Heart.

Our newest and greatest specialty in Water Melons. The most valuable Melon offered in years. An all-round Melon unsurpassed. Early, large, handsome, heavy, good shipper, long keeper, brightest color, best quality. Vines vigorous, very productive; ripens early and bears long. Fruit large, oval, very heavy mottled or netted like illustration; light and dark green. Rind thin, but very strong, making it a melon unsurpassed for shipping. Flesh red. melting and sweet. The best keeper. The Indiana Sweet-Heart Melon brings a good price, when others rot for want of purchasers. One of the most satisfactory things we ever sold. Every melon grower needs it, would not do without it if he knew how good it is. A great ball of sweetness. Read the telegrams:

A Record Unsurpassed. "Sweet Hearts" bring fancy prices when others are not wanted.

Cleveland, O., Aug. 20, '94. Sweet Hearts selling to-day Me to 18c, others 12c to 13c. Williams Bros.

### White Beaut Sunflower

EURENAL or with Snow White Seeds.

It's a novelty indeed. A novelty in 1,000. And is sure to meet with a large and enduring demand.

After years of careful selection we are rewarded with a pure bred Mammoth Single-head Sunflower with pure snow white seeds, which, on account of the deficiency of strong coloring matter in the outer covering of their kernels, are much superior to the darker sorts for stock and poultry food. It also produces a milder, better flavored oil.

This strikingly distinct new sort is not only the most beautiful, the most vigorous, the most valuable for stock and poultry feeding, and for oil production, but owing to the fact that all its powers are expended in producing one mammoth head, it is simply a marvel for productiveness, out-yielding the old sorts almost two to one, 3600 lbs. per acrebeing no unusual yield.

We are pleased to offer this grand novelty to our customers, and predict that it will lead all varieties when its merits are known.

Price, pkt. 10c, 1/4 lb. 25c, lb. 75c, post paid.

CUCUMBER, WHITE WONDER.—Very hardy and productive. The cucumbers grow about 8 inches long and two inches thick; the skin is thin but tough; color ivery white; the fight is not sold and a region of the fight is the production of the fight is the production of the fight is the plant dearlier than not other Cheumbers and Is also a sure cropper. Plat. 5c, oz. 10c, ); 1h. Sic. 1b. 75c.

## House Course at Honest

No Cath Prizes, Guessing Contests, Frentiums, Discounts or other Catchpenny or Lotters behaviors

# A New Turnip, CARTER'S CARDINAL.

A flat Turnip of distinct and fine qualities. This variety is

distinct from others, having a deep cardinal skin, which not only appears on the top, but also covers the whole root. Of course we do not recommend it entirely on ac-

count of its novel color, but as a

good, all round variety, and one that can be depended on in hot, dry seasons, and on a great variety of soils. The Cardinal is of medium size, flat, with very short top, and of fine table quality. It is one of the best varieties to grow on hot, dry land, not running to seed like some early kinds, and being quite sweet and solid. The Cardinal has a strong tap root, this doubtless pro-

tecting it from drought, and having thick, spreading foliage, the root

one of the very earliest, being ready for use a short time after sowing. Pkt. 10c, 3 for 25c, oz. 20c, 1/4 lb. 65c, lb. \$2.00.

# Egg Plant-Earliest Delicatesse

This is the height of perfection of the Egg Plants known and cultivated. It grows most rapidly, producing a great number of pearshaped, thick and fleshy fruits of a brilliant black color, which are of the finest flavor. This variety leaves all others far behind and on account of its great earliness may be cultivated even in the North. Pkt. 15c, 2 for 25c, 5 for 50c.

NOTICE We still sell the Perfection Fence Machine. Best Machine made for building Wire and Picket Fence.

Best and cheapest fence you can make. Price reduced to \$8.00. Send for circulars.

What the Newspapers Say About Everitt's Man-Weight Farm and Garden Tools.

The AGRICULTURAL EPITOMIST, Indianand pleasant. Ordinary work is done with no more exertion than to walk over the ground. No person can realize without a trial what effective work they can do with This innovation is bound to revolutionize hand cultivation and will effectually shut out of the market all the hand push machines."

AMERICAN TRIBUNE, Indianapolis: "It goes between the rows and around each plant; it searches out the weeds, loosens and pulverizes the earth. One can scarcely believe, without seeing it tried, how much a man or boy can do without working hard with one of these machines. Mr. J. A. Everitt is a public benefactor in every sense of the word, and the farmers and gardeners owe him a debt that they cannot readily repay." repay."

AMERICAN IMPLEMENT HERALD, Indianapolis: "Among new implements recently introduced none has attracted more wide spread attention than Everitt's Manweight Farm and Garden Tools. This useful invention is a decided departure in the line of man-power implements such as are in general use among gardeners, truckers and farmers."

AMERICAN AGRICULTURIST, New York: "The Man-Weight implements will prove a great boon to all cultivators of the soil, as it accomplishes its work in the most perfect manner, and does so with the least possible outlay of strength on the part of the worker,"

PRAIRIE FARMER, Chicago: "It will be welcome news to all who cultivate the soil with the hand push machines, to hear that their time of deliverance has arrived, and that with Everitt's Man-Weight Cultivators all this work and much that has not been attempted with the push machines can be done almost without work."

FARM, FIELD AND STOCKMAN, Chicago: "With the Man-Weight machine cultivating and hoeing can be done at one operation much better and quicker than with horse power and hand hoeing."

A new industry in its in-A golden yellow raspberry of beau-hape, large size and splendid flavor. Illars was agreed to the originator for 40, and it was first sold in 1893 for 55,00 a Enritest berry known. Plants 25c, 5 for \$1.06, 12

Bismark Apple Tree, 2 years old, in fruit.

A thornless Raspberry-Blackberry originated in California. The fruit is as large as the largest blackberry, and produced in immense clusters. Color a cleer, dark rich red; flavor of the blackberry and raspberry combined, mild, pleasant, vinous, peculiar to this berry alone. Excellent for all purposes. Seeds small, soft and few. Berries firm and carry well. Growth strong, 10 feet and more in a season; enormous bearer. Fruit ripens early, just after strawberries and before raspberries become plentiful. Always sells at highest prices. Vine is fust-proof and without objectionable thorns. Never attacked by insects or disease. Undoubtedly the most valuable fruit known and the hardiest. Bears first year from plenting. Price for Plante, 1900 coach.

\* SPECIAL OTFIP We will send of these four remerkable new write, by man, noof pasts, to one sections, for \$1.000.

YELL does the writer remember the factor of Errly Rest—the good was in the first in a small growth of the control of the contr

## Breitle Early Theroughbred.

in all desirable qualities; as valuable as a profitable variety to grow. We then a good fortune that we have it to offer, and the public may be thankful that we are offer g it, as no e in the country

#### EVERITT'S THOROUGHBRED POTATO-Continued.

tribution than we. EVERITT'S EARLY THOROUGHBRED grown on

#### EVERY FARM IN THE COUNTRY.

But this will not occur this year, as there is not enough seed to go around. But what we sell this year will multiply rapidly. Our customers of this year will supply their neighbors at good prices, and soon, very soon, the desired results will be accomplished, as a good thing like

#### EVERITT'S THOROUGHBRED POTATO

cannot be kept hidden long.

It is fortunate that we are able to place before our readers the testimony of other well known people, who also place a high estimate on this new potato, thus carrying conviction by the multitude of evidence.

We quote from T. B. Terry, a great farmer of Ohio, as follows:

#### BLOOD WILL TELL.

Yes, blood will tell, no matter whether it is in stock ing in their appearance to indicate that they were better than any ordinary potatoes one could pick up in any farmer's cellar. I have a good many potatoes sent me to test in this way, and often find that they are no better than old varieties. We had a number on trial this ter than old varieties. To make the trial more complete, I got two tuyear. To make the trial more complete, I got two tubers of adout the same size from an old farmer's stock, and planted them by the side of the others. He said they were Early Rose. I can't say about this, but they are an early kind that he has grown a long time without any change of seed. All these potatoes were cut to one eye, and planted recisely as the rest of our field crop was planted. They were put right in the field, and not on selected ground, but on average. No manuring or fertilizing whatever was done on the land where they grew. Nor did they have any extra tillage. We dropped these pieces in drills made the same as allower the field, and then treated all the field alike till digging-time. I took a fork and threw out the hills planted with the new early potato and I never was so surprised with the new early potato and I never was so surprised in all my life at any results obtained in potato culture. In every hill there were great, large, beautiful potatoes, such as I have never seen since the first year the old Early Rose came around. There were practically no small ones, or medium sized ones—just enormous ones, such as you might perhaps look for under very favorable conditions in a wet season. Now, I am not exaggerating a bit. The first year I grew the Early Rose there were a good many tubers as fine and large as these. have never seen any early potatoes on my farm since, as fine, until I dug these. There were 45 pounds. They re-semble the Rose in shape, color, and quality very

They are quite early, and were ripe entirely be

fore the rains came, so this great growth was made with little chance. The tops were not large.

The two tubers obtained from a farmer's cellar gave me 15 lbs, of rather small potatoes. There were hardly any that you could call medium, and many small ones. The two lots were each given about three hills less than The two lots were each given about three hills less than half a square rod to grow in. The yield per acre of the new potato was over 24C Tushels. The yield of the others a little over 80. Here was a difference of 140 bushels per acre, due entirely and only to blood. In other words, the vigor and vitality of the new seedling enabled it, under precisely the same conditions, to grow three times as many bushels. Now don't think this is an advertisement of the potato. When I planted the tubers I thought in all probability I should never have any occasion to mention it. But there is a great lesson any occasion to mention it. But there is a great lesson taught by this little experiment. Thousands of farmers are using seed that has so run out that there is no profit in raising the crop. I would not be rash. I am pretty careful myself. But you will make a mistake if you don't change seed occasionally and get the benefit of new blood. In the line of new potatoes we are constantly testing, and outset to change when it will profit the stantly testing. of new blood. In the line of new potatoes we are constantly testing, and quick to change when it will pay. We raised the Early Rose largely for years; but careful tests made us change to Early Beauty of Hebron, Snow-flake, Monroe Seedling, etc., as these newer varieties came out. Do you know the night after I dug those 45 pounds of new potatoes I hardly slept at all? My potato blood was so stirred up I couldn't cool down. T. B. TERRY.

Also, from A. I. Root, the well known Publisher and Bee-keeper, of wide reputation, who saw the above report, we have the following remarks:

The above little story so stirred up my "potato blood" that I could hardly wait till the next morning. Do you know why? Because I determined to make Terry a visit on purpose to see that 45 lbs. of potatoes. Furthermore, I decided it was the potato I wanted for some experiments I am getting ready for in the way of growing early potatoes under glass. A ride of 20 miles on the steam cars and 8 miles on a bicycle brought me to the steam cars and 8 miles on a bicycle brought me to Terry's, and I saw that new early potato. They were down in a dark cellar, in a bushel basket, with a big tub turned over them so as to be sure nobody got those precious tubers for dinner, by mistake. I wanted one of those potatoes very badly. I would have given adollar for just a little one; but I knew beforehand that friend Terry would neither sell nor give away even the smallest potato. They had not tried any of them for eating, for they are too valuable. I do not know what some of them might weigh, but considerably over a pound, I should judge? And this great yield was without any particular show of tops.

I was satisfied with my visit, and started back on my wheel with more enthusiasm than when I came. By pretty hard riding I managed to reach the power-house just as the conductor was calling out "all aboard."

Perhaps you do not realize how much of a find this

Perhaps you do not realize how much of a find this new potato is. It is very early—perhaps as early as anything we have. None of our other exceedingly early potatoes are good yielders. This is a tremendous yielder, and the tops are small, so it will be just the thing to grow for early potatoes under glass or in beds covered with cotton sheeting.

Take it allocather. I believe that earth all its other good.

Take it allogether, I believe that, with all its other good qualities—earliness and wonderful productiveness—it is the crowning triumph of to-day in potato growing.

A. I. Root.

\*

DON'T DELAY in getting a start of this great Potato. You will gain nothing by delay, and are bound to loose much. You will have them sometime. A small quantity procured now will soon give you all the seed you want and some to sell before the price goes down. One lb. of seed will yield 3 to 5 bushels, with ordinary care, or 20 TO 30 BUSHELS, if you give them extra care and follow instructions we will send to every purchaser. You may say this is impossible, but we assure you it is not. We will explain the method and you will then see it is simple enough. This knowledge itself is worth many dollars to every potato grower, besides, all the EVERITT'S THOROUGHBRED POTATOES you grow this year will be worth \$2.00 to \$5.00 per bu. for your own seed or to sell for seed.

THE ILLUSTRATIONS on preceding page show a tuber on a 9 inch plate boiled ready for the table, drawn from nature, and the product of one row as photographed in the field after digging.

#### FARM AND IAN=WEIGH Everitt's GARDEN TOOLS Celebrated

TESTIMONIALS. See Further Particulars page 64, and 3d and 4th Cover Pages.

YAN-WEIGH

My customer, for whom I ordered the combined Man-Weight, is more than pleased with it. I have given him all the time he wanted to test it.

ELMER V. WALKER, OXFOR, Maine.

I received the Man-Weight Cultivator and have given it a trial and find it better than I expected. I think it is one of the grandest garden tools ever invented, and I would not give it for any other that is in the market. Fifty dollars would not buy mine if I could not get another.

JACOB BRICKEE, Muncie, Ind.

The Man-Weight Cultivator works like a charm. The man using it says he would not be without one.

BIMON SEYERT, Gibralter, Pa.

The Man-Weight is truly superior in its class and a curiosity in my neighborhood. F.M. MEYERS, West Salem, O.

I am well satisfied with the Man-Weight machine and shall do all in my power to recommend it to my neighbors.
WM. C. DENHAM, Tokama, Kas.

The Man-Weight machine arrived and I am much pleased with it. It does the work all right. Every man whose garden I had it in said it was the greatest plow they ever saw work.

ALLEN GUINN, Sellersburg, Ind.

Man-Weight Cultivator is received and it is gratifying to know and be able to state that it fills the bill to the very letter of the law.

A. D. Houser, Annapolis, O.

The Man-Weight Cultivator proves to just what you say. I am well satisfied be just what you say. I am well satisfied be just what you say. I am well satisfied with the purchase. Will do all I can to make sales.

C. G. Shapper, North Freedom, Pa.

The Man-Weight Cultivator has given me complete satisfaction. It is one of the best tools ever invented for the garden and I could not do without it.

G. W. RIPLEY, Atwood, Ill. The Man-Weight Cultivator is perfection, so much lighter to work than the old fashioned "pasher." I am highly pleased with it.

W. Girakorkar, Seed Grower, Monticello, Fla.

We received the Man-Weight Cultivator all right and we were well pleased with it. We have a large garden and worked it entirely with the machine. We never had a later garden nor one better filled with rice things than this summer. We would not do without it. Those who nice things than this summer. We would not no manage as a saw it work say it is the best cultivator they ever saw.

Mrs. ROSETTA MENTIES, Albion, Mich.

In popular language, the Man-Weight Cultivator is a "daisy." think it saves 500 per cent. over the use of the hoe in running through the strawberry rows. A neighbor is equally as enthusiastic.

E. Lovejoy. Alblon, Mich.

I delayed writing until I had thoroughly tested the Man-Weight machines in different kinds of soil, and now can say it has worked very nicely for me in the various crops of a vegetable garden as a weed killer, far surpassing in effectiveness and speed far surpassing in effectiveness and speed any of the old style hand push machines I have ever used, besides it is much lighter and easier to manage. It pulverizes the soil better than any other garden tool I have ever seen in operation. It does away with horse cultivation in many cases, thereby saving plants from destruction. It think much of the movable drag bars, allowing you te adjust the machine to wide or narrow rows. I think the principle on which the machines are constructed sound, practical and hard to best. Orin Braver, Albany Ce., N. Y.

I have tried the Man-Weight Cultiva-I have tried the Man-Weight Cuttiva-tor and find it a good tool. It will to a great extent, take the place of borse cul-tivation, and is many times faster than beeing. It can be used for all kinds of work and particularly is it valuable after a dashing rain to loosen up the ground. N. NIEDHAM, Indianapolis, Ind.

The Man-Weight Plow works beautifully. I can do as much work and better fin one hour with it than with a hee in three hours. It is only by using it and observing the results that its value can be

realized. In time you will make extensive sales. We have two Jersey cows giving over a pound each of butter daily. These for profit. Alden's Cyclopedia and other books, for instructions, a piano for extensioners and Everiti's Man-Weight Cultivator to insure wholesome rations.

M. E. P. WHITEHEAD, Jersey, O.

rations.

Cultivator to hand O. K. I set it up as a double machine and worked a half acre of potatoes that have not had any vain for three weeks and I gave it a thorough test; the ground being very compact, and it disamirable work, so much so that I truly would not take four times the price for it, were I unable to procure another. This may appear to be strong language on first trial, but I know after I had it for a while them. I would not part with it at all. I tattracts considerable attention.

I remain your highly grastfied friend,

W. Burr Fox, Portage, The

Mammoth White French Artichoke.

THE GREATEST FOOD FOR HOGS.

YIELDS 600 TO 1,000 BUSHELS PER ACRE.

THE wonderful productiveness and ease with which these Artichokes can be produced is always a surprise to those who cultivate them for the first time. are an excellent food for cattle, sheep and horses, and the cheapest and healthirney are an excellent food for cattle, sheep and norses, and the cheapest and healthest hog food raised; one acre being equal to five acres of corn for building up large
healthy frames with plenty of bones and muscle. They not only grow rapidly, but fatten
on them, only requiring corn for a short time in the finishing process. The hogs harvest
them themselves, thus saving all expense, even that of feeding. Freezing and thawing
does not injure them, and the hogs will feed themselves from October 1st, in this latitude, until the late spring, when grass has come, except when the ground is frozen
solid. Also they are a certain preventative of diseases. We have never
known hogs fed on Artichokes to die with cholera, while herds around them
died by the score. No farmer can do better than plant a piece of ground to Arti-

died by the score. No farmer can do better than plant a piece of ground to Artichokes without delay. On good corn land they produce 600 to 1,000 bushels per acre, and do not fail in dry seasons. The tops, which are produced in immense quantity, make excellent food for horses, cattle, sheep and mules when properly cured. To destroy them, plow under when they have attained a foot in height.

in height.

These are much easier destroyed than the wild variety.

They should be planted early in the spring, cut small like potatoes. Plant 18 ins. apart in rows 3 ft. apart. The next spring break up the ground. The plants will appear all over the surface. Run through both ways and leave plants stand in hills like corn. Three bushels will plant an acre.

-We have an enormous crop this year; the yield running 1,000 acre and more. We accordingly sell them very low, so every Pricebus, per acre and more. mediately. \*

# The BUSH LIMPS Plant all 4. One Packet of each, 20c.

(See Comparative Size of Beans to Left).

BURPEE'S (No. 1)--This is the true large Lima in bush form, and comes true from seed. The plant grows 18 to 20 inches high. Stout and erect, branching so much that each bush is circular and 2 to 3 feet in diameter. The leaves are large and of great substance. It is an immense yielder; each bush bearing 50 to 200 large pods filled with the large beans, equaling in size and luscious flavor the large Pole Lima. Pkt. 6c, pt. 25c, qt. 45c.

DREER'S (No. 2)—All who are acquainted with the delicious flavor of Dreer's Pole Lima will want to growthis bush variety which is its equal in all represents and her the advantage.

DREER'S (No. 2)—All who are acquainted with the delicious flavor of Dreer's Pole Lima will want to grow this bush variety, which is its equal in all respects and has the advantages of bush form. We recommend them highly. Pkt. 6c, pt. 25c, qt. 45c.

HENDERSON'S (No. 3)—This was the first Bush Lima Bean offered, and a few years ago it took the country by storm. It is a very early variety and enormously productive. While the beans are not so large as Burpee's and Dreer's, yet this variety is more of a rough and ready sort and merits general cultivation. It is largely grown as a field crop for dry beans, being a reliable and heavy yielder. A light soil, inclining to sand, suits them best. Pkt. 6c, pt. 20c, qt. 40c, bu. \$5.00.

JACKSON WONDER (No. 4)—This is the latest Bush Lima to appear on the market and in some respects is quite novel and distinct from the others. Bushes grow from

distinct from the others. Bushes grow from 20 to 30 inches tall. When pods are young, they may be used as snap beans, when dry as limas. They are very productive; bear-ing until frost comes, and drought does not greatly affect them. When cooked they are greatly affect them. When cooked they are rich, marrowy and fine flavored. Pkt. 6c, pt. 25c, qt. 45c.

IMA BEANS can now be grown with so little trouble that every family should have an abundance.

SHOWING HABIT OF GROWTH OF 😕 🥯 BUSH LIMA BEANS.

# ANS POLE OF RUNNING

Lazy Wives—No good wife would like to be called a "lazy wife," yet she will be excused for exhibiting a lazy spell when "bean picking" time comes, if she has the foresight to plant this variety. They are called lazy wives because they hang so full and the pods are so long and broad that a mess is soon picked. The pods are green, wonderfully broad, thick, fleshy and entirely stringless, retaining all their good qualities until nearly ripe. The peculiar taste and agreeable flavor of this bean are so captivating that other varieties are not desired while the Lazy Wives can be obtained. Pkt. 6c, 3 for 20c, ½ pt. 15c, pt. 25c, qt. 45c.

Golden Andalusian—The pods are 6 to 8 inches long, thick, fleshy and stringless. It is very common to pick ½ bu. from a single vine at one picking; begin bearing when quite young and continue till frost. The beans are pure white and are a fine winter shell bean.

beans are pure white and are a fine winter shell bean. Pkt. 6c, pt. 25c, qt. 45c.

Early Golden Cluster Wax—It grows rapidly, bearing very early, clusters of three to six pods of rich golden color. Pods average about 8 inches in length, tender and entirely stringless, retaining their plumpness and tenderness long after they have attained a large size, and continue to bear, if the pods are picked, until front Pkt 6c at 25c at 45c

size, and continue to bear, if the pods are picked, until frost. Pkt. 6c, pt. 25c, qt. 45c.

White Crease Back—For string beans it is simply perfection. Its handsome, green pods grow from 5 to 6 inches long, perfectly round, with a crease in the back. They ripen early and bear continuously all summer, the vines being loaded from one end to the other. Pkt. 5c, pt. 25c, qt. 40c, ½ bu. \$1.50.

Kentucky Wonder—A very prolific sort, grows vigorously, and climbs well; pods grow in large clusters, green, 9 to 10 inches long, nearly round; crisp and tender. Sure to give great satisfaction: excellent to

grow in corn. Seed long, oval, brown color. We sell more of this variety of Pole Beans than of any other to our city customers. This hint may be of advantage to parties undecided what to purchase. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.50.

Horticultural—A round, speckled bean, used both in the pods and shelled. Pkt. 5c, pt. 25c, qt. 40c. peck \$1.50.

Early White Dutch Case Knife—One of the earli-

est of all. Suitable for corn or poles, flat pods, well filled with fine, large beans. Excellent for winter use.

Pkt. 5c, pt. 25c, qt. 40c, peck \$1.50.

Red Speckled Cut Short—An excellent variety and peculiarly valuable for planting among corn. Vines medium; pods short, round, tender and succulent. Good green or dry. A wonderful yielder. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.50.

## POLE LIMA BEANS.

Price of each pkt. 6c, pt. 25c, qt. 45c, ¼ bu. \$2.00.

Dreer's Improved—An improvement in quality on the Large Lima. They are plumper and richer: remain green longer.

Large White-This well known and delicious bean

King of the Garden—A magnificent variety in growth of vine and number and size of pods. Specimens have been grown over nine inches in length,

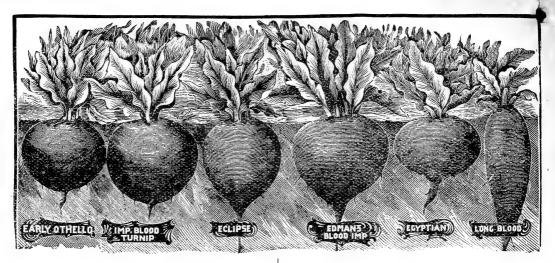

and containing seven great large beans.

Challenge—Have been constantly improved by saving beans from the strongest vines and best filled pods.

They yield an amazing quartity of shelled beans.

Willow Leaf Lima—The cartiest of all. Maturing in

the far north. Unapproached in productiveness, 1,729 vigorously, and climbs well: pods grow in large cluspods having been produced on one vine, besides being ters, green, 9 to 10 inches long, nearly round; crisp and very ornamental; each vine making a tall shaft covtender. Sure to give great satisfaction; excellent to ered with foliage, bloom and pods.

Prices of all varieties in this Prices of all varieties in this list except where given: Pkt. 3c, oz. 6c, ½ lb. 15c, lb. 35c, paid. By freight or express, I lb. or more of

a kind, 25c per lb.

Early Othello—A dark blood turnip variety, unsurpassed for market gardeners who require a variety of the darkest color; also in beauty of form and sweetness of flavor is without a peer. Pkt. 5c, oz. 15c, ½ 1b. 25c, lb. 75c.

Improved Blood Turnip—The best strain of this popular sort. The result of years of careful selection, which has increased its size and made it earlier. Color rich, deep red, fine grain, solid. Excellent for all

purposes.

Eclipse—A great acquisition to our list of turnip heets. Always gives the greatest satisfaction among market gardeners. It is as early as the Egyptian, and much more desirable, owing to its globe shape, great smoothness and regularity, having a small top, very sweet, flesh fine and dark blood color.

Edmand's Turnip-A selected strain very uniform Edmand's Turnip—A selected strain very uniform and even in type; flesh deep blood red, exceedingly sweet and tender; of good market size. It is very carly, and for marketmen's use is justly popular and much called for wherever it has been sold.

Extra Early Egyptian—Ten days to two weeks earlier than the Blood Turnip. Of fair quality, medium size, fine for foreing.

dium size: fine for forcing.

Improved Long Blood Red-One of the finest beets for winter and spring use; also, on account of its great productiveness, very valuable to grow for cattle. Sweet, crisp and tender; color rich red; withstands drought.

Dewing's Improved Blood Turnip—Very symetrical in shape and free from fibrous roots; flesh deep

blood red.

Half-Long Blood—An ex Good also for winter and spring. Blood-An excellent second early.

Lentz's Extra Early Blood Turnip--As early as

Egyptian; larger and of unsurpassed quality, Will protender and sweet at all times, old or young. duce a crop six weeks from planting.
Bastian's Extra Early—Very early, of quick, large

growth; fine turnip form, and bright, red color.

Early Flat Bassano—Early, roots flat, turnip-shaped; flesh white, circled with rose color.

Early Yellow Turnip—Similar to Blood Turnip in

Farly Yellow flesh.

Swiss Chard—A distinct vegetable, and makes superior greens. The ribs are used as asparagus, the Swiss Chara a sparague, perior greens. The ribs are used as asparague, perior greens. We recommend all our customers

### MANGEL WURZEL AND SUGAR

FOR STOCK FEED.

Price of all varieties: Pkt. 2c, oz. 5c, ½ lb. 12c, lb. 35c, by mail. By freight or express, 1 lb. or more at 25c per pound.

Mammoth Golden Giant—Color yellow, broad at top and bottom, making very heavy roots. A favorite

with leading farmers.

Mammeth Long Red—Grows to an immense size, single roots weighing 30 to 50 lbs. Under high culture 2,000 bus. per acre have been grown. Quality excellent.

Golden Tankard—The fiesh is deep yellow to the center. One of the best and richest for food for sheep

and cattle. Highly prized by stockmen.

Champion Yellow Globe—The short root makes it

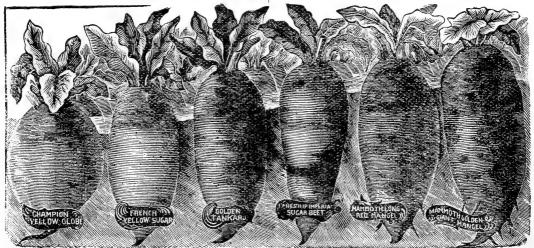

particularly valuable for light soils; of fine quality and particularly valuable for fight sold, the same a heavy cropper.

Lane's Sugar Beet—Long, symmetrical roots, fine grained and very sweet; a heavy cropper; splendid for table use or cattle feeding.

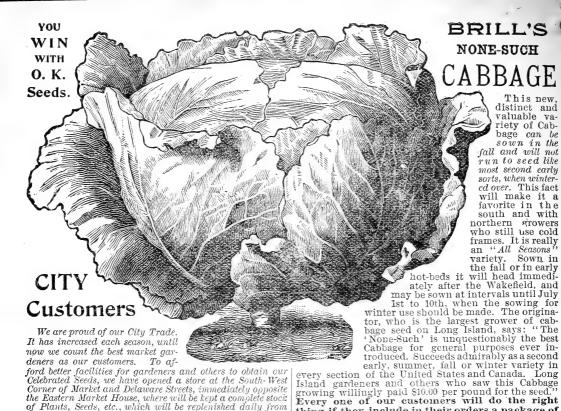

French Yellow Sugar—Grows very large, much above ground. Very rich in sugar.

Vilmorin's Sugar Beet—Color white, medium size.

Greatly esteemed by sugar manufacturers.

LATE VARIETIES.

The public are cordially invited to call and see us at either

Autumn King—A grand autumn and winter cabbage. Heads of enormous size and very solid. This variety excels all others in weight of crop per acre. Pkt.
4c, oz. 15c, ¼ lb. 50c, lb. \$1.50.
All Seasons—We have sold this reliable

variety for 8 years with the greatest satisfaction to our customers. If sown early will produce large heads early, and if sown late is a superior winter sort. We sell this cabbage in large quantities to many

large growers who prefer it to all others. Pkt. 3c, others. oz. 12c, ½ lb 35c, lb. \$1.25. lb.

of our stores.

Everitt's Superior Large Late Flat Dutch-So well known as scarcely need description. Our "superior" strain is unexcelled. Pkt. 3c, oz. 12c. ALL SEASONS.

14 1b. 35c, 1b. \$1.25. Succession—A fine fall and winter cabbage. This variety is one of the surest to head, scarcely a plant failing. Pkt. 4c,

oz. 15c, 1/4 lb. 50c, lb. \$1.50. Sure Head-Takes its name from its quality of always heading up, even under unfavorable conditions. In all cases gives great satisfaction for general crop. Pkt. 3e, oz. 12c, 4 lb. 40c, lb. \$1.25.
Fottler's Improved Brunswick—Pro-

duces a large, firm, solid head, often weighing from 20 to 30 pounds. Pkt. 3c, oz. 12c, 1/2 lb. 40c, lb. \$1.25.

Marblehead Mammoth Drumhead-

The largest headed cabbage. Its size is indeed mammoth.

Pkt. 3c, oz. 15c, ¼ lb 40c, ib. \$1.25.

Drumhead Savoy—A very large-headed variety, partaking of the size of the Drumhead Cabbage; flavor of the Savoys. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

### CAULIFLOWER.

thing if they include in their orders a package of this fine Cabbage. Pkt. 10c, oz. 25c, ½ lb. 65c, lb.

Early Snowball-Probably grown more than all other varieties together, for forcing or wintering over for early crop. It is exceedingly early and hardy and is one of the surest to make a solid, compact head. Pkt. 15c, ½ oz. 75c, oz. \$1.50.

Extra Early Dwarf Erfurt—Gilt edge

Very desirable for forcing or for planting out doors. Plants compact, with few narrow, upright leaves, making it the best for close planting; forms solid. com-

pact heads under very unfavorable conditions. Our stock is unsurpassed. Pkt. 15c, ½ oz. 75c, oz. \$1.50, ¼ lb. \$6.00.

#### BRUSSELS SPROUTS.

Improved Dwarf-The plant grows about two feet high, and produces from the sides of the stalk numerous little sprouts, one or two inches in diameter, resembling cabbage. Pkt. 5c, oz. 15c. 1/4 lb. 60c. \*

BROCOLI—Early Purple Cape—Produces color, very close and compact, and of excellent flavor. Pkt. 5c, oz. 25c, ¼ lb. 75c.

Price of all Carrots, unless otherwise quoted, Pkt. 3c, oz. 8c, 1/4 lb. 20c, lb. 60c. By freight or express, not less than 1 lb. of a kind, 50c per lb.

Early French Forcing—The earliest variety, largely grown for forcing purposes; globe shaped root of an orange red color.

Early Searlet Horn—Best for early planting out of doors. Tops small, coarsely divided; roots top shaped, surface dented, skin orange red.

Ox-Heart-This new carrot comes from France. is intermediate in length between the half-long varieties and the Short Horn, but much thicker than the latter, attaining at the top 3 or 4 inches in diameter. It is of fine quality for table use, and deserves general cultivation.

Half-Long Scarlet Nantes-Tops medium; roots cylindrical, smooth, bright orange; flesh orange, becoming yellow in center, but with no distinct core; of the finest quality. This variety is extensively used in France for culinary purposes, and only needs to be known to supersede the coarser sorts for garden culture.

New Chatenay-This new half-long stump-rooted carrot is one of the most productive varieties known, has an extra large shoulder, is easily dug, and is in every way desirable. It is very smooth, fine in is in every way desirable. It is very smooth, texture, and of a beautiful rich orange color. worthy of cultivation.

Danver's Half-Long Orange—A most excellent variety for all soils. It will yield the greatest bulk with smallest length of roots of any variety, 20 to 30 tons being no unusual crop per acre.

Red Saint Vallery-A large, beautiful Carrot, of a rich, deep orange red color. The roots grow very straight and smooth, from ten to twelve inches long. Very fine quality for table use, and very productive.

Large White Belgiun—Grows one-third out of the ground; immense yielder; large size; easily gathered; very suitable for stock.

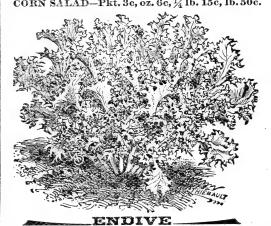

Improved Long Orange—Long roots, good yielder. Good for table or stock. We offer the best strain of this fine variety.

Giant Victoria—This is the Goliath among the carrot mily. Under rich manuring it will grow to be nearly -This is the Goliath among the carrot family. the size of an average Mangoldwurzel.

CRESS OR PEPPER GRASS—Sow early in the spring, very thickly in shallow drills. The sowing should be repeated every week, as it soon runs to seed. Used as a small salad. Extra cured. Pkt. 2c, oz. 6c, 14 lb. 15c, lb. 50. Water Cress—True. Pkt. 10c, oz. 25c, 14 lb. 75c.

CHICORY, Large rooted or Coffee-Pkt. 4c, oz. 10c, 1/4 lb. 30c, lb. \$1.00.

COLLARDS—A variety of cabbage. Pkt. 5c, oz. 5c, ¼ lb. 30c, lb. \$1.00. CORN SALAD—Pkt. 3c, oz. 6c, ¼ lb. 15c, lb. 50c.

Green Curled—Not only most useful as a salad, but it is highly ornamental from its delicately cut and colored leaves. It is much used for garnishing. (See cut). Pkt. 3c, oz. 3c, ½ 1b. 25c. Broad Leaved Batavia—Chiefly used for flavoring.

Price the same as above.

KOHL RABI—Early White Vienna—Very early, small, handsome, white bulbs. Pkt. 4c, oz. 15c, 1/4 lb. 50c.

Early Purple Vienna-Indentical with former, except in color. Pkt. 4c, oz. 15c, 1/4 lb. 50c.

Farmers and Gardeners have so often been disappointed in Seeds, Potatoes and Grain from which they expected great things, and with good reason, that they hesitate to invest in anything new, and often allow a really valuable article to pass. A well-established house can not afford to trifle with their customers in this way. Before we offer a new article we go to the trouble to ascertain that it is strictly O. K., and we point with pride to the many choice varieties of vegetables, grain, potatoes, etc., of our introduction that are now in general cultivation.

OP COR GROW FASTER THAN POP CORN. THEY DELIGHT IN GROWING IT AND IT OFTENTIMES MAKES A LONG EVENING PASS QUICKLY AND PLEAS-ANTLY. WE NOTICE THE OLD FOLKS ARE NOT AVERSE TO SOME OF THE TENDER MORSELS, STORE PLENTY OF POP CORN IN THE GARRET. Mapledale Prolific—A most prolific variety; has borne as high as 18 good ears on one stalk, but we find 4 to 6 ears a good average. Besides its prolific character, the quality of the corn is superior. Ears 6 to 7 inches long, pure white grains, and pops large, pure white and tender. Pkt. 4c, lb. 25c, 4 lbs. 75c, by maii; by express or freight, 8c per lb.

Queen's Golden—The handsomest of all pop corns. Large ears, golden yellow grains. A great yielder and extremely tender when popped. Pkt. 4c, lb. 25c, 4 lbs. 75c, by mail; by express or freight, 8c per lb.

Silver Lace—Grows 5 to 6 feet high, very productive, producing 3 to 4 perfect ears on a stock. The ears are very handsome, 5 to 6 inches long and always filled out to the end with smooth. round, metallic, white grains. Superior

fect ears on a stock. The ears are very handsome, 5 to 6 inches long and always filled out to the end with smooth, round, metallic, white grains. Superior quality when popped. Pkt. 4c, lb. 25c, 4 lbs. 75c; by express, 8c per lb. White Rice—The standard market variety. Pkt. 3c, lb. 25c, 4 lbs. 75c, by mail; 8c lb. by freight or express. Snow Bail—Like the flakes of snow falling as it pops and like a pile of pure white snow as it lies in a heap. Tender, rich, melting. You can not desire more in quality. Early and productive. Pkt. 4c, lb. 25c by mail; by express or freight 10c per lb. more in quality. Early and p press or freight, 10c per lb.

Boys' Favorite—Quite a novel sort; grows of many different colors. All growing on the same ear. Very yieldy. You should grow a few hills of this, sure. Pkt. 5c, lb. 30c by mail.

The following varieties will be found very useful about every house. Start the seed early and transplant.

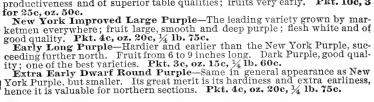

Nest Egg—They exactly resemble the eggs of hens, and are very useful as nest eggs, never breaking or freezing, and are never injured by wet. By using them many eggs can be saved. The plant grows very rapidly, and is useful in covering unsightly places, being quite ornamental. Pkt. 5c, oz. 15c.

Dipper—This variety makes a splendid tool for dipping hot liquids. The handles do not heat through. Pkt. 5c, oz. 15c.

Disheloth—Wakes an admirable vegetable disheloth. The peculiar lining is

Dishcloth-Makes an admirable vegetable dishcloth. The peculiar lining is the part used, which is sponge-like, porous, very tough and elastic. The vines are very ornamental. Pkt. 5c, oz. 20c. 

New Pearl White-This great novelty resembles the New York Purple in shape, but is pure white and oftentimes exceeds that popular variety in size. It is unequaled by any other sort in productiveness and of superior table qualities; fruits very early.

DWARF WHITE PEARL

Dwarf Green Curled German-A dwarf variety, rarely exceeding 18 inches Dwart Green Curled German—A dwart variety, rarely exceeding 18 inches in height, but spreading out under good cultivation to three feet in diameter. The leaves are beautifully curled and of a bright green. Very hardy. It is most tender after being bitten by a sharp frost. Pkt. 3c, oz. 8c, ½ lb. 20c, lb. 75c. German Dwarf Green—A variety having large, moderately frilled leaves covered with a dense bloom. It is popular in the South, where it grows all winter without protection and is also planted largely in the North, where it is known as "Sprouts" or "Siberian Kale." Pkt. 3c, oz. 8c, ½ lb. 25c, lb. 80c.

Cottage—A variety of great favor: an immense cropper.

Pkt. 10c. 3

ian Kale." Pkt. 3c, oz. 8c, ½ lb. 25c, lb. 80c.
Cottage—A variety of great favor; an immense cropper.
Pkt. 3c, oz. 8c, ½ lb. 25c, lb. 80c.

EGYPTIAN

its only fault (if this can be considered one) is the immense size and not excelled for family use. of the ear. meaty Sweet Corn. Medium early, of extra strong growth, stalks and cobs of a beautiful pink color, grain white, ears large, 12 to 14 rowed, wonderfully productive. Pkt. 5e, pt. 20c, qt. 30c, peck 75c.

Black Mexican—This is the sweetest variety

Its color prevents it from be-

coming a desirable market sort.

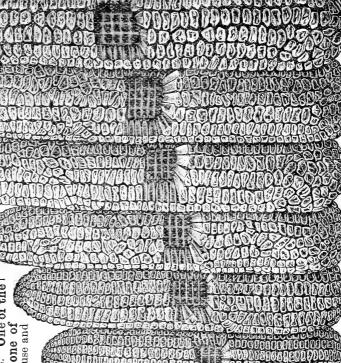

PLANT

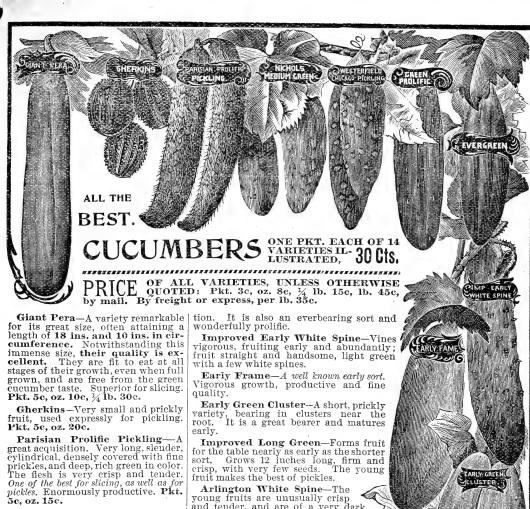

SEEDS

The Stowell's Evergreen—Grown more extensivly than any other variety, being a great favorite with ears are of large size, kernels very deep, tender and sugary; very productive, and remains a long canners and market gardeners for late use. time in fit condition for table use

12 to 18 rowed ears and deep grains. One of the Everitt's Excelsior-Ripens early; has large largest varieties grown, and one of the very sweetest. For home use and choice market trade it is unsur-

Early Mammoth-This variety produces the largest ears sometimes weighing 2 or of any sort, a single ear It is of excellent quality, sweet, tender and delicious and 3 pounds. passed

Nichols' Medium Green—Very thick through, full at both ends, handsome in appearance, and of fine quality. The vines are vigorous in growth, and very productive.

Westerfield's Chicago Pickling-Fruit medium length, pointed at each end, with very large and prominent spines; color deep green. Largely grown for factories. Extra early and very productive.

Green Prolific or Boston Pickling—A very prolific variety; thriving in any locality. With good culture 200,000 can be raised on an acre.

**Evergreen**—One of the handsomest and most valuable. The fruit remains a long time in prime condi-

Arlington White Spine—The young fruits are unusually crisp and tender, and are of a very dark green color, so that the variety is considered by many to be the best for small pickles.

Suske—This engumber grows some

Snake—This cucumber grows sometimes to the length of 6 ft., curled up like a snake. Pkt. 10c.

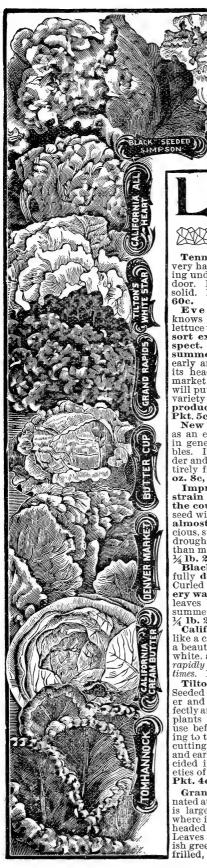

New Everbearing—Of small size, very early, enormously productive and valuable as a green pickler. Vines exhibit at the same time cucumbers in every stage of growth, the small ones being perfect in shape, of a fine green color and just the size for pickling.

Jersey Pickling—Certainly one of the finest pickling cucumbers in the market. Early and a great bearer, well formed firm and crisp

formed, firm and crisp.

Early Russian—The earliest of all; small size.

**NEW YORK** 

2c PER PKT. AND UPWARD. ettuce full size packages. seeds guaranteed o. k. IN EVERY RESPECT.

Tennis Ball—A fine early sort; very hardy. One of the best for foreing under glass or early planting outdoor. Heads are small but extremely solid. Pkt. 2c, oz. 7c, 1/4 lb. 20c, lb. 60c.

Everlasting—Every gardener knows the importance of having a lettuce that is slow to run to seed. This sort excels all others in this respect. It will remain almost all summer in prime condition. It is early and remarkable for the size of its head. Particularly do we urge market gardaners to grow it, and it will put money in their purses, as no variety will bring more money nor produce a more permanent crop. Pkt. 5c, oz. 15c, ¼1b. 40c, lb. \$1.25. New York—Heads almost as solid

as an early summer cabbage, which in general form it somewhat resembles. It blanches itself naturally, tender and of excellent flavor, and entirely free from bitterness. Pkt. 3c, tirely free from bitterness. oz. Še, ¼ lb. 25c, lb. 75c.

Improved Hanson-The finest strain of this popular variety in the country is what we offer. Our seed will produce mammoth heads almost as solid as cabbage, delicious, sweet, crisp and tender. Stands drought and scorching heat better than many others. Pkt. 4c, oz. 8c, ½ lb. 25c, lb. 75c.

Black Seeded Simpson—Grows

fully double the size of the Early Curled Simpson, and is better in ev-ery way. It is much lighter colored, leaves being almost white. Stands summer splendidly. Pkt. 4c, oz. 8c, 14 lb. 25c, lb. 75c. California All-Heart—It heads up

like a cabbage and almost as solid, of a beautiful light green shade, almost white, and a very rich flavor; grows rapidly and is tender and sweet at all times. Pkt. 5c, oz. 20c, ½ 1b. 50c. Tilton's White Star—Of the Black

Seeded Simpson type, butgrows largeer and more rapidly; blanches perfectly and is of excellent quality. The plants remain long in condition for use before running to seed, and ow-ing to the thick leaf keep long after cutting without wilting For forcing and early planting out doors, it is a decided improvement over other varieties of this class for either purpose. Pkt. 4c, oz. 10c, 1/4 lb. 30c, lb. \$1.

Grand Rapids-This variety originated at Grand Rapids, Mich., where it is largely grown for shipment and where it is considered the best loose headed lettuce for forcing under glass. Leaves medium size, of light yellowish green color, much crimped, and frilled, very upright growth; forms

a fair sized but loose head; crisp, tender and a good quality. Will stand der and a good quality. Will stand without spoiling a week to ten days after it is fit to cut. Pkt. 4c, oz. 8c,

"4 lb. 25c, lb. 75c.

Buttercup—For beauty of foliage, extreme tenderness and delicacy of flavor, it is hard to beat. Always forms good solid heads. It is one of the best of all new varieties. Pkt. 4c, oz. 8c, ¼ lb. 25c, lb. 75c. Denver Market—An early variety

Denver Market—An early varnety of Head Lettuce, either for forcing or open ground. It forms large, solid heads of a light green color, and is very slow to go to seed. The leaves are crisp and tender, and of excellent flavor. By these blistered leaves it distinguishes itself from any other kind of lettuce now grown. Pkt. 4c, other

oz. 8c, ¼ lb. 25c, lb. 75c.
California Cream Butter—A distinct variety of cabbage lettuce. It forms round, solid heads, as shown in illustration. The leaves are of a very rich cream-yellow color-most refreshing in appearance, and particularly rich and buttery to the taste. The heads are of good size, compact, very hard and solid. The heads are so solid that generally they have to be cut before any seed stock can make its appearance. Pkt. 4c, oz. 10c, ¼ 1b. 30c, lb. 85c.

Tomhannock-Entirely distinct from all other existing varieties and of superlative fine quality. It forms a beautiful plant ten to twelve inches high, grows very quickly, is ready to cut early; remains for weeks of the finest quality. Pkt. 3c, oz. 7c, ¼ lb. 20c, 1b. 60c.

Early Curled Siesia—The first to produce edible leaves. For forcing and early spring sowing it is very popular. Pkt. 3c, oz. 7c, ½ lb. 20c, lb. 60c.

The Deacon-Forms large and very very crisp, tender and of first-rate quality. Pkt. 4c, oz. 8c, ¼ lb. 25c,

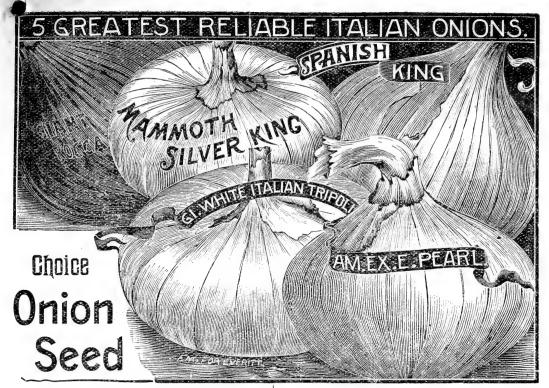

lb. 75c.
"All Summer Lettuce". dozen varieties mixed. Will give you excellent lettuce all summer from one sowing. Try a packet this season. Large pkt. 5c, oz. 15c, ¼ 1b. 40c.

A PACKAGE OF ANY VARIETY OF STANDARD SEEDS TO TEST WITH

THE SAME VARIETY FROM ANY OTHER HOUSE. O. K. SEEDS ARE THE BEST AT THE LOWEST PRICE AND WE ARE DETERMINED THAT YOU SHALL KNOW IT.

### ITALIAN ONIONS.

All of the varieties grow very rapidly from seed, and are veeter and of more delicate flavor than our American onsweeter and of more delicate ions; while the bulbs are of the most beautiful shape and color. We advise growers to devote their main crop and color. to the American varieties, yet we recommend them to vary it by planting part of the Italians. We recommend them highly for summer and autumn use in the family, while if marketed they command fancy prices.

If by freight or express, deduct 10c per lb.

Giant Rocca or Naples One of the best known of the Italian onions in this country. Quite extensively grown in some sections, where they produce immense crops; single bulbs weighing 1½ to 2 pounds each. Flavor very mild and delicate; color, light brown; flesh white; very handsome; globular shape; a good keeper. Pkt. 3c, oz. 10c, ½ lb. 30c, lb. \$1.00.

Mammoth Silver King
most beautiful onions in the world.
Single specimens have weighed as much as 5½ pounds. No other onion excels in mild and delicate fiavor, or has a more handsome and beautiful silvery white appearance. So mild are they in taste that they can be eaten raw like an apple. They always command a high price in the market.

Pkt. 4c, oz. 15e, ½ lb. 40c, 1b. 81.25.

Spanish King The outside skin is of a rich, yellow straw color, while the flesh is white, sweet, mild and tender. They bottom well, are free from stiff necks, and have produced more bushels (1,127) marketable onions to the acre than any other variety known. Very rapid growth and matures early. In market it attracts marked attention. Pkt. 5c, oz. 15c, ¼ 1b. 45c, 1b. \$1.50.

Giant White Italian Tripoli Of large size and most beautiful form, with fine white skin. The first season from the black seed it will grow an onion from 1 to 1½ pound, but to attain the full size seed should be started in a hot bed and transplanted. Pkt. 4c, oz. 10c, ¼ 1b. 30c, 1b. \$1.19.

American Extra Early Pearl This remarkable onion is one of the earliest, and in great size, thickness, rapid one of the earliest, and in great size, thickness, rapid growth, bottoming and keep ng qualities, it is searcely excelled. It grows quickly to an enormous size, of pearly white color, the outer skin having a most showy, waxy appearance, flesh of a pure snow white, and flavor so mild that it can be eaten like an apple. This onion has the valuable quality of resisting Northern winters. Sow the seed in the spring, thickly, and raise sets. These can be set out in September or October, and early in May the onions are as large as hen's eggs. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

#### American Varieties of Onion Seeds.

If by freight or express deduct 10c per lb.

Large Red Globe—This is a very handsome variety and is deserving of general cultivation. It matures quite early; grows to a large size; skin deep red; flesh fine grained, mild and tender. Pkt. 4c, oz. 15c, ½ lb. 40c, 1 lb. \$1.25.

White Globe—A large globe-shaped onion; firm, fine grained of mild flavor; keeps well. This is one of the handsomest onions grown, of beautiful shape, clear, white skin, and commands the highest market price. Pkt. 4c, oz. 20c, ½ lb. 60c, lb. \$2.00.

Southport Large Yellow Globe—This new variety is entirely distinct from the Danvers. It is a very handsome, round or globe-shaped variety, of large size, with thin yellow skin, white flesh, fine grained, mild, very firm, and the best of keepers. It ripens early and sells readily at the highest prices in our markets. It is a most reliable variety for bottoming, and entirely free from scallions. Pkt. 3c, oz. 10c, 1/4 lb. 35c, lb. \$1.15

White Silverskin or White Portugal-Very desira-White Silverskin or White Portugal—Very desirable for family use; flavor mild and pleasant; skin silvery white; of handsome appearance; highly esteemed for pickling when young, also for market in early winter. Extensively planted for White Onion Sets. Pkt. 5c, oz. 20c, ½ lb. 60c, lb. \$2.00.

Extra Early Red—Very early, medium size, deep red color. Pkt. 3c, oz. 10c. ½ lb. 30c, lb. \$1.00.

Extra Early White Barletta—Without doubt the very earliest onion in cultivation. Pure white color, very mild and delicate flavor. For table use and pickling it is most valuable. Pkt. 4c, oz. 15c, ½ lb 50c, lb. \$1.75.

\$1.75.

White Queen—A small very early variety. The quality is excellent. Pure white outside and inside. Can be sown from February to July. Largely grown for pickling. Pkt. 4c, oz. 15c, ½ lb. 50c, lb. \$1.75.

LEEK American Flag—Used for soups and salpeas. Pkt. 5c, oz. 15c, ½ 1b. 40c, lb. \$1.25.

MUSTARD Black or Brown—Pkt. 5c, oz. 10c, lb. 45c.
White—Best for salad. Pkt. 5c, ½ lb. 15c, lb. 45c.
NEW CHINESE—Highly esteemed for salads, particularly in the south. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 85c.

#### YELLOW GLOBE DANVERS.

This magnificent sort can not be too highly recommended. It is more extensively grown than any other variety. 600 bus, per acre is an ordinary crop under favorable conditions, while 800 bus, per acre can be grown by a skillful cultivator from seed sown in the spring. We offer but one variety of Danver's Onion and that is the best. For reliability in bottoming our strain is unsurpassed. Bulbs are very handsome, round, of good size, with thin, straw-colored skin; flesh white, fine grained, firm, mild and excellent quality. It ripens early, keeps well and sells readily at the highest price. Our Yellow Globe Danvers is all that can be desired as a market and table Onion. We sell seed in 100 lb. lots to individual growers year after year.

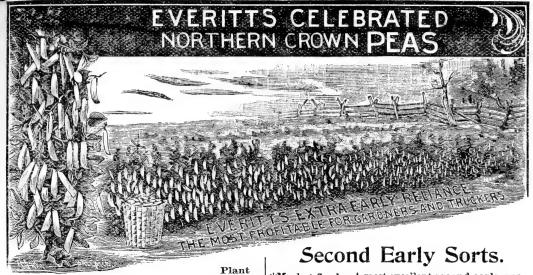

PRICE—Pkt. 3c, oz. 8c, \(\frac{1}{4}\) lb. 25c, lb. 85c.

#### LARGE RED WETHERSFIELD.

It is oftentimes a matter of choice of color what onion is grown. To those growers who prefer a red variety we recommend our large Red Wethersfield. This is also one of our greatest specialties, and next to Yellow Globe Danvers we sell the largest quantity of seed of it. It is the most reliable red onion grown for general purposes. It yields enormous crops; from 600 to 800 bus, per acre, and is a most reliable cropper even under unfavorable conditions. Large size, purplish-red skin, flesh purplish-white, form round, flattened, fine grained, moderately strong flavor. The best keeper. Especially adapted to poor and dry soils

PRICE—Pkt. 4c, oz. 10c, \(\frac{1}{4}\) lb. 30c, lb. \$1.

PLEASE REMEMBER We have a large supply of all kinds of Onion Seeds and intend to sell it at less than cost rather than carry it over.

peas with Everitt's Man-Weight Drill and cultivate the crop with Everitt's Man-Weight Cultivator.

Prices of packets, pints and quarts include postage. If sent by freight or express deduct 8c per pint, 15c per quart from prices named. ½ bu. and ½ bu. at bu. rates.

Varieties marked \* are wrinkled.

#### Extra Early Sorts.

Extra Early and Early Peas were a short crop in 1895. Everitt's Extra Early Reliance In all the essentials of home garden pea this is perfection. It has made friends wherever planted, and is acknowleged by all acquainted with its merits as being unexcelled in earliness and productiveness. They are now largely grown by the best gardeners in the country. Height about two feet, vines loaded with weil-filled pods. Pkt. 5c, pt. 18c, qt. 32c, bu. \$3.75, 5 bu. or more at \$3.50 per bu.

\*McLean's Little Gem—A dwarf, prolific, green, wrinkled marrow, having all the flavor of late wrinkled peas. Height, one foot; require no support. Largely grown for canning as well as for market. Pkt. 5c, pt. 20c, qt. 35c, bu. \$4.50, 5 bu. or more at \$4.25.

\*American Wonder-So well and favorably known that it scarcely needs description. Our seed is strictly true to name and the choicest strain. Extra early; requires no bushing; exquisite flavor. Pkt. 5c, pt. 20c, qt. 35c, bu. \$5.50, 5 bu. or more at \$5.25.

Alaska—This beautiful pea has become a standard variety and the earliest of all blue peas, proving to be not only several days earlier than most early sorts, but of larger size and 10 per cent. more productive. Wines are dwarf, growing only about 20 inches high; maturing the crop for one picking; of excellent quality. Pkt. 5c, pt. 20c, qt. 35c, bu. \$4.00.

First and best-Vines dwarf, about 18 inches, bearing straight, handsome pods, each containing six to eight medium sized, round peas. Matures all the pods in about 45 days. Pkt. 5c, pt. 18c, qt. 32c, bu. \$3.75, 5 bu. or more at \$3.50.

Kentish Invicta—A round, blue variety, producing straight and handsome well-filled pods, and is quite We regard it as a market variety of great excellence, and can also be planted for a general crop. Pkt. 5c, pt. 18c, qt. 32c, bu. \$3.75, 5 bu. or more at \$3.50.

\*Extra Early Premium Gem-Very fine dwarf pea, of Little Gem type, on which is a decided improvement; larger pods; more productive. One of the best and most profitable Early Wrinkled peas for market gardeners, and for family gardeners there is none better than Plan For and part of the pear of the pe ter. Pkt. 5c, pt. 20c, qt. 35c, bu. \$4.75, 5 bu. or more at \$4.50.

\*Perfection—A smooth blue pea, growing about 1½ foot high. Prized by canners. Quality and flavor can not be surpassed. Pkt. 5c, pt. 18c, qt. 32c, bu.

\*Market Garden A most excellent second early pea, particularly prized by market gar-dens on account of its great productiveness as well as fine quality. It grows about two feet high, very stocky and requires no sticks. Pkt. 5c, pt. 20c, qt.

35c. bu. \$5.00.

\*Satisfaction This delicious pea is fast gaining in popularity, and many of our customers are now placing their main reliance on them and con-

sider them superior to any other for fine table qualities.

The vine grows vigorously to the height of about 2½ feet, requiring no brush or sticks to hold them up, being very stocky and robust, and literally filled with large showy pods, which almost hide their foliage.

They continue in bearing longer than any other early sort. The peas when green are unusually large; when dry are much more wrinkled than any other sort. Satisfaction is here to stay. Try it. Pkt. 10c, pt. 30c, qt. 50c. By freight or express, 4.qts. \$1.00

\*New Abundance
This new variety is the most prolific known. Plant, half dwarf; 15 foliage, large, thick, full and dark green. Pods 3 to 3½ inches long, roundish and wellfilled, containing 6 to 8 large wrinkled peas of excellent quality. Pkt. 5c, pt. 20c, qt. 35c, bu. \$4.00.

#### Late Sorts.

\*Pride of the Market Requires no sticks and are quite unequaled in productiveness. Robust, free-branching habit, 18 to 20 inches high, and are immensely productive. The pods are so large in size and handsome in appearance that they take high rank for exhibition purposes, and the peas, when on the table, are of so splendid a quality that it would be difficult to over-praise them. This pea is in great demand among market gardeners, and we have never had enough to supply the demand. Pkt. 5c, pt. 20c, qt. 35c, bu. \$5.50.

Black-Eyed Marrowfat—A favorite variety; grows about 5 feet high; Pkt. 5c, pt. 18c, qt. 30c, bu. \$2.00, 5 bu. or more at \$1.75.

Large White Marrowfat-A favorite sort. 6 feet high. Pkt. 5c, pt. 18c, qt. 30c, bu. \$2.00, 5 bu. or more at 1.75.

\*Champion of England—A standard sort; popular in all markets. Productive; high flavor, seeds wrinkled. 5 feet high. Pkt. 5c, pt. 18c, qt. 32c, u . \$3.50.

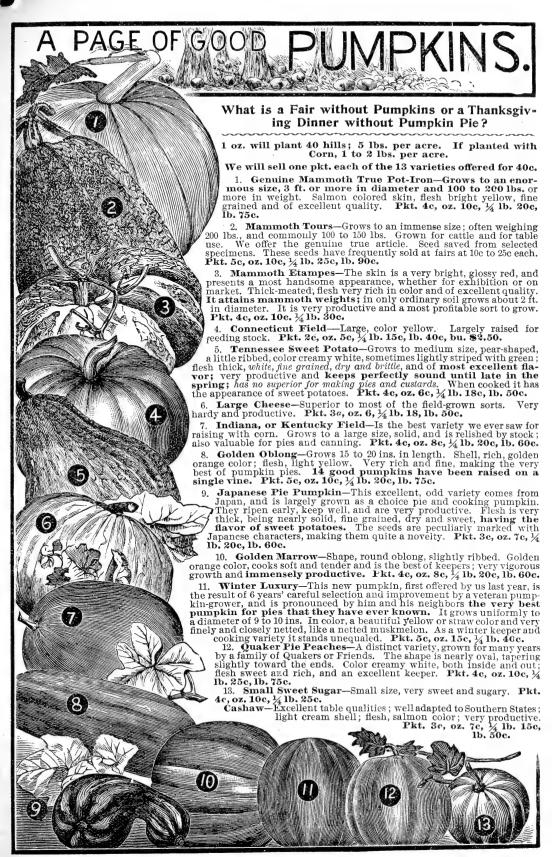

\*Telephone—A tall wrinkled marrow; very productive, and of the best quality, with long pods containing 7 to 10 very fine flavored peas. Height, about 4 feet. Pkt. 5c, pt. 20c, qt. 35c, bu. \$5.00.

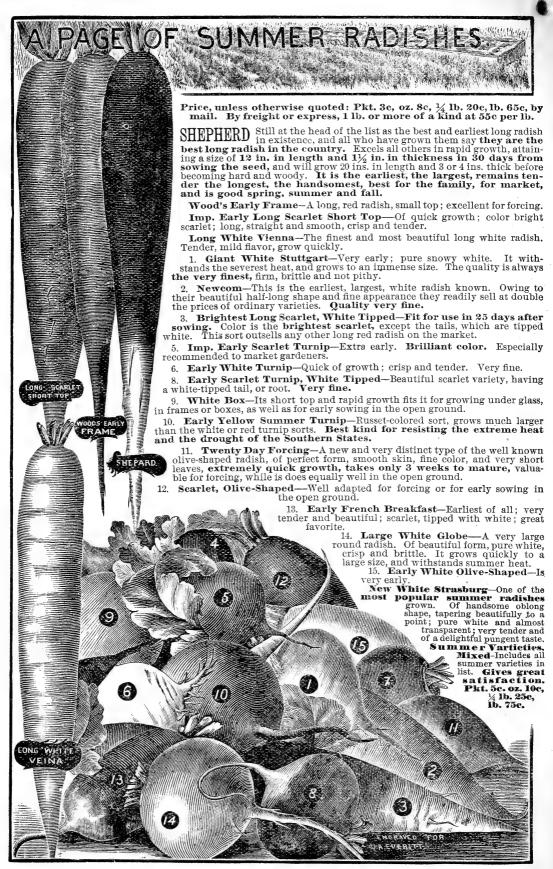

SUGAR PEAS-Tender Pods. Those who have not tried them can not begin to imagine the fine table qualities of Sugar Peas.

Tall White Sugar—Seeds white. Foliage green; a well known variety; height, four feet. 5c, pt. 20c, qt. 35c, peck \$1.50.
Sweet Melting Sugar—The best Sugar pea. Foliage light

and fine. 4 feet.

#### NTER RADISHES.

Price of all varieties: Pkts. 4c, oz. 8c, 1/4 lb. 20c, lb. 65c.

The following varieties should be sown in August or September, for use during the winter:

California Mammoth White-It grows to a large

California Mammoth White—It grows to a large size; flesh solid and of good Flavor,
Long Black Spanish—One of the latest as well as the hardiest of the radishes. Roots oblong, black, of a

very large size and firm texture.

White Chinese—Root nearly cylindrical, 6 to 7 ins. long, and nearly 3 ins. in diameter; piquant and very

Round Black Spanish—Black skin, white flesh, and

Round Black Spanish—Black Skin, white nesh, and roots globe-shaped. The flavor is piquant.

Chinese Rose—This variety has become very popular with market gardeners. It is of a half-long shape, pink color, and flesh as solid as an apple.

Winter Varieties, Mixed—Includes all the winter varieties in our list. Large Pkt. 5c, oz. 10c, ¼ lb.

25c, lb. 75c.

#### SQUASHES.

MAMMOTH CHILL The largest of the squash mense. The largest squash on record—292 pounds—was of this variety. If you want to secure the premium at your county fair, plant some of this seed. Color, orange yellow, smooth skin; flesh very thick and fine grained, good and nutritious. A profitable variety to grow for stock feeding. Keeps well through the winter. Pkt. 4c, oz. 8c, ½ lb. 25c, lb. 75.

Mammoth White Bush, Scalloped—The squashes are very uniform in shape and wonderfully prolife.

Mammoth White Bush, Scalloped—The squashes are very uniform in shape and wonderfully prolific. They are fit to use very early, are of a beautiful white color, and grow very large size—12 to 15 ins. across. Pkt. 4c, oz. 8c, ½ lb. 20c, lb. 60c.

Giant Summer Crookneck—This new strain is even earlier than the common variety; the squashes grow to an extra large size, measuring from 18 ins. to 2 ft. long, of finest quality. On account of their handsome appearance they command an extra price on the market. Pkt. 4c, oz. 8c, ½ lb. 20c, lb. 60c.

ket. Pkt. 4c, oz. 8c, ¼ lb. 20c, lb. 60c.
Fordhook—A handsome variety, bright yellow outside, and straw yellow within. The flesh is dry and

sweet, and of the best quality. Placed in a cool, dry room, keeps in a perfect condition throughout the winter. It is free from the attacks of the squash borer. Matures early, and is everywhere a sure cropper. Immensely productive. The green squashes can be used at any stage of their growth. Pkt. 4c, oz. 8c, ½ lb. 25c. lb. 75c.

Prolific Orange Marrow—The skin is a rich, deep orange, making the squash of very handsome appearance. As large as the Hubbard; the flesh is very thick, fine grained and of choice quality. In prime condition from September to January. Pkt. 3c, oz. 6c, ½ lb. 15c, lb. 50c.

Hubbard—Generally considered the best winter squash grown; flesh dark yellow, fine grained, dry and sweet; very hard shell; will keep till spring; prductive; color, green, when ripe. Pkt. 4c, oz. 8c, ¼ lb. 20c, lb. 60c.

Yellow Bush—A popular variety. Grows to medium size and of unsurpassed quality. Pkt. 3c, oz. 6c, ½ lb. 15c, lb. 50c.

Essex Hybrid—A very productive squash, of finest quality, and an excellent keeper, specimens having been

quality, and an excellent keeper, specimens having been kept until June as sound and good as when gathered. Early, quick growth, and can be raised very successfully as a second crop, following early potatoes, peas, etc. Pkt. 4c, oz. 8c, ¼ lb. 20c, lb. 60c.

Sibley, or Pike's Peak—Shell pale green, very hard and flinty, but so very thin and smooth as to occasion the least possible waste in baking. The flesh is solid and thick; a vivid, brilliant orange color, dry, and of a rich, delicate flavor. Very productive; ripens its fruit with the Hubbard. It remains in a good dry cellar perfectly sound until the last of March. Pkt. 3c, oz. 6c, ¼ lb. 15c, lb. 50c.

Canada Winter Crookneck—The best of keepers. Color. pale green; excellent for table use. Pkt. 3c.

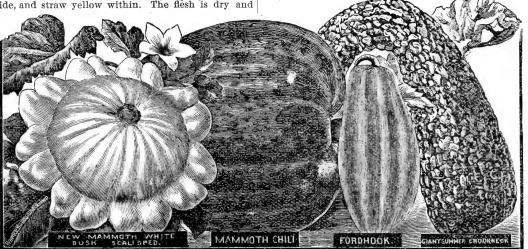

Color, pale green; excellent for table use. Pkt. 3c, oz, 6c, ¼ lb. 15c, lb, 50c.

Marblehead—An excellent variety, resembling the

Hubberd. A remarkable combination of sweetness, dryness and delicious flavor. Pkt. 3c, oz, 6c, ¼ lb. 15c, lb, 50c.

New Golden Custard-An improvement on the old New Golden Custard—An improvement on the one Yellow Bush so well and widely known. Very early, of a bright, golden yellow, often producing squashes 12 to 15 ins. across. Pkt. 5c, oz. 10c, ½ 1b. 30c, lb. \$1.00. Summer Crookneck—Early and productive, small size, bright yellow, hard shell; used while young and tender and can not be excelled. Pkt. 3c, oz. 6c, ½ 1b.

15c, lb. 50c.

#### RHUBARB.

Victoria—Very large stalks, from 2 to 3 ins. broad and from 2 to 3ft. high. Excellent for pies. Pkt. 3c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

Rhubarb Roots-By mail, 25c per lb., 4 lbs. 75c. By freight or express, \$1.00 per dozen.

#### SALSIFY.

MAMMOTH SANDWICH ISLAND-Mammoth, manmoth sandwitch island—mammoth, indeed, as compared with the common kinds. It is pure white in color and has all the good qualities of the other, which, with its great size, will recommend it to all gardeners. It should be found in every garden in the land. Pkt. 4c, oz. 10c, ½ 1b. 40c, 1b. \$1.50.

Long White—Pkt. 4c, oz. 8c, ½ 1b. 25c, 1b. 85c.

#### SPINACH.

We will send any variety of Spinach by freight or express, at 25c per lb.

Thick Leaved Round—Generally preferred for early sowing, and is a popular sort with market gardeners. Leaves large, thick, and fleshy. Pkt. 2c, oz. 4c, ½ lb. 15c, lb. 35c.

AMERICAN SAVOY-A sort of the finest quality, and producing nearly twice the weight of crop as other sorts, and is also the hardiest of all Spinachs. The leaves are numerous, succulent, curled and wrinkled like a Savoy Cabbage. Pkt. 3c, oz. 5c, ½ lb. 15c, lb.

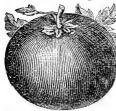

BLOOMSDALE-The leaves are numerous and partially rolled. It is much liked by gardeners wherever introduced. Pkt. 3c, oz. 5c, ¼ lb. 15c, lb. 35c.

#### TOMATOES.

Our seed is saved with great care. We never buy seed saved at canning factories, which usually is badly mixed and proves a great annoyance and loss to the planter.

1 oz. will produce about 4,000 plants. Sow about 2 ozs. of seed in beds for each acre of erop you want to grow.

Price unless otherwise quoted: Pkt. 3c, oz. 10c,  $\frac{1}{4}$  1b. 50c, 1b. \$1.50.

Mikado.

MIKADO-Also called Turner's Hybrid, is one of the finest, largest, most solid and most productive tomatoes grown. The heaviest to-mato ever grown of this mammeth Variety was grown from O.K. Seeds—weight, 4 lbs. 2 oz. Rapid grower, thick stalk; beautiful shape and color; the weight averages from 1 to 4 lbs. Pkt. 5c, oz. 20c, 1/4 lb. 75c.

EARLY ESSEX HYBRID-This is one of the most profitable tomatoes for the market in cultivation. Pink skin, very early and always ripening all over alike. The flesh being very hard and solid makes it one of the best tomatoes for shipping or marketing. We recommend it

OPTIMUS—The large handsome tomatoes are free from cracks and are borne in clusters of 3 to 5. The flesh is fine grained and solid, of a bright crimson scarlet color. Very early. One noticeable feature is the splendid keeping and shipping quality of this tomato.

IMPROVED TROPHY—Fruit large, smooth and solid, fine color; very productive; a well-known and popular market sort.

popular market sort.

PERFECTION-Shaped like the Acme, but some

what larger, fully as early, per-fectly smooth, blood-red in color, with more solid flesh and fewer seeds and produces more and larger fruit at the end of the season.
SELECTED ACME—One

SELECTED ACME—One of the earliest in cultivation. Fruit of medium size, perfect form, round, slightly depressed at the poles; pink purplish color. Ripens evenly and has no green core. Bears continuously until frost comes.

Selected Acme.

NEW STONE-This new main crop tomato very large, bright scarlet red color, smooth shape. Its distinguishing feature, and from this it takes its name, is its great solidity. The flesh is very firm. One of the best shippers. A grand coming variety, unsurpassed for keeping.

PONDEROSO—A mammoth variety for which \$250.00 was paid for a name. We will sell you a packet for 5c, or 3 for 10c.

Golden Queen—There are many varieties of fine red tomatoes, but every gardener will hail with delight this fine yellow sort. In size, solidity and productiveness equals any of the red. Pkt. 5c, oz. 15c, ½ lb. 50c, lb. \$1.75.

LONGKEEPER—This new tomato of recent introduction was originated by F. S. Carman, editor of "The Rural New Yorker." It is claimed by the originator to

combine longkeeping qualities, uniform shape, earliness in ripening, as well as productiveness to a remarkable degree. Pkt. 4c, oz. 15c, 1/4 lb. 65c.

Paragon—Very similar to Livingston's Favorite.

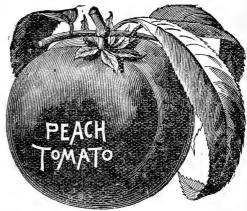

Tomatoes for Preserving—Red Cherry, Yellow Cherry, Red Pear-shaped and Yellow Plum. Each, Pkt. 5c, oz. 25c.

and shipping.

LIVINGSTON'S NEW BEAUTY -A fine variety, coming from originator of Acme, Paragon, Perfection and Favorite. Very distinct from all former introductions. The color is a glossy crimson with a purple tinge. It grows in clusters of four and five, retaining its large size late in the season; very solid, with a tough skin, making it very desirable for market

Don't fail to include Logan's Giant and Everitt's Earliest of All Tomatoes in your order. See Novelties

PEACH TOMATO—This very useful and beautiful oddity is sure to attract attention and favorable comment, whether growing in the garden or served on the table. It is almost identical with some forms of peaches, both in shape and color. The fruit is produced in clusters; it is very solid with red interior, and red. pinkish and green blush on the outside skin, which can be easily peeled, like the skin of a peach. Vines compact easily peeled, like the skin of a peach. Vines compact in habit and very productive. For preserving, Peach in habit and very productive. For present Tomato is hard to beat. Pkt. 5c, oz. 20c.

LIVINGSTON'S FAYOR-ITE—Ripens evenly and early, holds its size to the end of the season. It is very prolific, few seeds, solid flesh, bears shipping long distances.

Cardinal-A beautiful cardinal red, very glossy looking when ripe; the flesh of the same brilliant color, ripens evenly through, having no hard green core like many others; very few seeds. Round and unusually smooth and solid.

Favorite.

## .. TABLE .. VARIETIES.

1 oz. will plant 250 feet of Drill. Sow about 1 pound broadcast per acre.

We sell any of the following varieties, unless noted, at pkt. 3c, oz. 6c, 4 lb. 15c, lb. 50c, by mail; by freight or express, per lb. 40c.

Early Six Weeks, or Snowball—This new tur nip is very early, growing and maturing rapidly. Bulbs beautiful white; medium size, solid. Flavor mild; free from side roots.

PURPLE TOP MUNICH—One of the earliest in cultivation, making an excellent spring garden turnip.

RED or PURPLE-TOP STRAP LEAVED—One of the most popular varieties, both for table and stock. Grows to a large size, solid, crisp and mild flavor. We have the best strain of this popular variety that can be found anywhere. None better.

EXTRA EARLY MILAN—The earliest flat turnip in cultivation. Of medium size, with a bright purple top; leaves few, short, growing very compact; flesh pure white, of choicest quality, havd, solid and fine-grained; an excellent keeper. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c.

EARLY WHITE FLAT DUTCH—Size, medium; flat, white, sweet, tender; rich for table; spring and fall.

WHITE EGG—A variety of very rapid growth; egg-shaped, thin white skin, solid, firm, fine-grained flesh.

ity. Of medium size, very quick growing, and the roots are very smooth and white. Flesh is perfectly white, fine-grained, and cooks in only fifteen minutes. It is the finest table turnip for winter and spring use. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c.

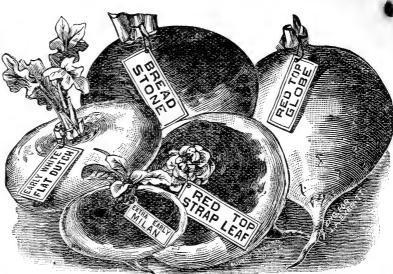

RED or PURPLE TOP GLOBE
—This is the most productive variety and one of the handsomest;
quality very fine for table; owing to
its great yielding propensities, can
be grown with great profit for stock.

GOLDEN BALL or ORANGE JELLY—Very beautiful and bright yellow turnip of medium size, sweet and delicious flavor.

Long White Cow Corn—Flesh white, fine-grained, sweet; keeps well.

LARGE WHITE GLOBE—Often attain the weight of 12 pounds; extra good fall and winter; skin white.

Sweet German—Must be sown much earlier than the flat turnips. In the autumn and early winter it is apt to be hard, but softens in time.

# Swedes, or Ruta-Bagas.

Price same as Turnips.

Grown for stock feed, and could be profitably cultivated on a much larger scale.

CARTER'S IMPERIAL—A hardy sort, excellent for table use or feeding stock. Does not run to long neeks. This should be sown a month earlier than the other varieties.

 ${\bf LAING'S}$   ${\bf IMPROVED}$   ${\bf RUTA\text{-}BAGAS\text{--}} \\ {\bf One}$  of the earliest and best for table. Handsomest variety, first-class quality.

LARGE WHITE FRENCH—Excellent for table use as well as stock. Large size, solid, mild and sweet. A desirable sort.

In July we will publish a SPECIAL TURNIP catalogue. Send for it.

WEET PEAS + S FOR THE MILLIONS We have thousands of pounds of ò choice mixed Sweet Peas in the greatest assortment of varieties What 10 K. X. O. E. ind every conceivable color. Every body can scatter them lavishly and revel in their sweet blossoms all the numiner. THEY ARE ALL THE RAGE. J. A. EVERITT, SEEDSMAN INDIANAPOLIS, IND.

Apios Tuberosa.

# BEAUTIFUL FRAGRANT CINNAMON VINE.

A beautiful and rapid climber, possessing the rare quality of emitting from its flowers the delightful odor of cinnamon, and very appropriately called the "Cinnamon Vine." The cinnamon, and very appropriately called the "Cinnamon Vine." The plants are grown from bulbs or roots, and are very nice for window ornaments or out-door culture. They are perfectly hardy, the stem dying down every autumn, but growing again in the spring so rapidly as to completely cover any trellis or arbor very early in the season. The vines often run 25 feet or more, and when trained over and about a door or window make an ornament much admired, while its

many clusters of delicate white flowers send out an amount of many clusters of delicate white howers send out an amount of fragrance that is truly wonderful. It is easy to cultivate; has no insect enemies, and is not affected by drought, because it roots so deeply. The tubers increase in size from year to year; are often two feet long at two or three years of age, and run straight down in deep soil. Flesh whiter than superfine flour and equally as good for table use as the very best potatoes.

e have sold these bulbs for several years, and the plant has ever increased in popularity.

Look at any other Catalogue you have and you

will see the usual price for these bulbs is \$1.00 per dozen. WE SELL THEM AT ½ DOZ. 20c, 1 DOZ. 30c, 2 DOZ. 50c, 5 DOZ. \$1.00.

#### APIOS TUBEROSA. Tuberous Rooted Wistaria.

A native climber and one of the most beautiful in cultiva-A native climber and one of the most beautiful in cultiva-tion. A profuse bloomer, bearing lovely clusters of rich, deep purple flowers with a delicious violet fragrance. It is a won-derfully robust grower, attaining a great height, its vine and dense foliage resembling the common Wistaria. The bulbs are perfectly hardy, needing no protection whatever, and last forever when once started; they are excellent for food when cooked, being equal to a potato. 10c each, 3 for 25c, 75c per dozen.

#### NEW YELLOW DOLICHOS.

This luxuriantly flowering vine is a most welcome addition to the list of annual climbers, and as a late, beautiful and prolific bloomer should have a place in every flower garden, or wherever bare walls or unsightly objects are to be hidden from the eve.

It blooms later in the season than other varieties, being at

its best when earlier climbers are brown and dead.

Erect racemes of bright yellow blooms, similar in shape to half-opened pea blossoms, form at every joint, and the leaves half-opened pea blossoms, form at every joint, and the leaves and stems are covered with downy, grayish hairs, producing a most novel effect. The outer surface of the petals is rich brown, interior space or standards soft, glowing canary yellow. The blossoms are succeeded by slender, rounded pods, which lend additional beauty to the vines, and are far more effective than the broad, coarse pods found in other varieties. The denser foliage of this new Polichos stands out in striking contrast to others, covering the poles with a heavy mass of vines when most other varieties were half way up the poles. Pkt. 10c. 3 for 25c. oz. 40c. Pkt. 10c, 3 for 25c, oz. 40c.

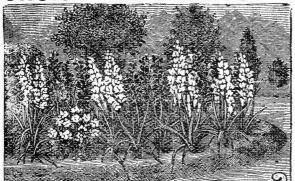

SPECIAL. These three choice climbers should be started around every home. As a special inducement to take them all, we offer 1 doz. Cinnamon Vines, 3 Apios Tuberosas and 1 pkt. Dolichos for 50c, post paid, or three such collections for \$1.00. These three choice climbers should

New Yellow Dolichos.

# CHOICE CLADIOLUS! GREAT BARGAINS

UR offers have never been equaled. The varieties are the best; the colors unsurpassed; embracing every color and shade.

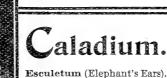

# For 50 Cts. BREUCH LEYENSIS—

Dazzling vermillion, yellow throat and broad purple stripe. MAD. MONERET—Delicate rose, with white stripe. CERES—Pure white, blotched with purple rose. LAMARCK—Orange and cherry, large white stain. JOHN BULL—White, slightly tinged with sulphur. NAPOLEON III—Bright scarlet, centre white. EUGENE SCRIBE—Carmine rose.

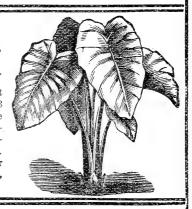

ISAAC BUCHANAN—Splendid yellow. And 5 bulbs of the fancy new variety, MAY. This is the most stylish of all. Enormous spikes of well expanded flowers, worth all we ask for the entire collection. All bulbs labeled. Examine any other catalogue and see if these 13 bulbs would not cost \$1.00 to \$1.50 if bought elsewhere.

FOT \$1.00 WE WILL SEND 3 COLLECTIONS, ALL POSTAGE PAID. ALL BULBS EXTRA LARGE SIZE. If separate bulbs are wanted, the price is 10c each.

EXRA FINE MIXED GLADIOLUS, 5c each, 35c per doz., \$1.75 per 100, post paid. By express, 100, \$1.50; 1000, \$12.00.

THE leaves of this giant plant often attain a length of 3 feet. Very suitable for single plant on lawn, beds or margins of water. Attains greatest size in a moist situation. Keep bulbs in dry sand over winter. Each 20c, doz. \$2, 4 doz. same rate.

## New Excelsion Pearl Tuberose

First is the best variety and is a general favorite and the most popular of all flowers for button-hole bouquets. Can be grown in pots or plant in open ground in May. The flowers of this variety are double the size of the common Tuberose, and are borne in great profusion. Of dwarf habit, perfectly double and of most delicious fragrance. No flower garden is complete without a few stalks.

Extra sized flowering bulbs, 5c each, 6 for 25c, 40c per doz., 25 for 85c, 100 for \$2.75, post paid. By express at expense of purchaser, 100 for \$2, 200 for \$3.50.

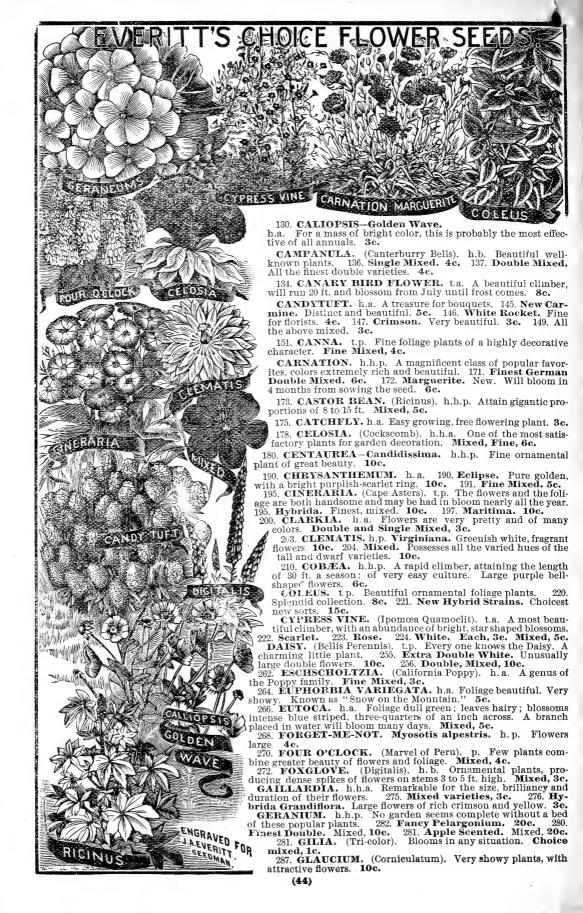

#### SACRED LILIES DIRECT FROM CHINA.

Chinese Sacred Lily for the window in winter. Why? Because it is of easy culture; it is sure to bloom; each bulb bears several clusters; the flowers are deliciously scented; you are sure to succeed. If you cultivate but half a dozen window plants the Sacred Lily ought to be one of them. Its popularity is increasing every year. If you grow it once you will want it again. We have a fine stock of immense bulbs and offer them by mail at following low prices: 7 bulbs \$1.00, 3 bulbs 50c, 1 bulb 20c. To grow them,

fill a bowl or any vessel about 4 inches deep half full of water; place the bulb therein and lay some pebbles around to keep it in an upright position. No order filled after April 1.

nonette. 3c, oz. 10c. (45)

J.A.EVERITT SEEDMAN

#### COOD CROPS BUT LITTLE KNOWN IT WILL PAY YOU WELL TO INVESTIGATE.

PASTURE, HAY, FERTILIZER AND SILAGE ARE WHAT FARMERS NEED, AND THESE CROPS ARE OF UNTOLD VALUE. THEY ARE EXACTLY AS RECOMMENDED.

With low prices of the regular farm crops and the land gradually running down in fertility, it behoves every farmer to cast around for crops that will bring more money or allow him to conduct his farm operations more economically. On this page and the next we offer some articles of great merit. They are not untried, untested novelties like sacaline, that a number of seedsmen imposed on their customers last season. We can conscientiously recommend each of these crops to be as stated below.

DWARF ESSEX RAPE There are millions of acres of good land that lie idle part or all of the year to run to weeds, that can be sowed to this rape and produce the finest feed imaginable and at the same time improve in fertility. It can be sown from May to September in this latitude. It can follow any other crop and furnishes most nutritious pasture, when oftentime cattle are roaming the fields in search of a scanty living. It is particularly valuable for sheep, being twice as nutritious as red clover. In fact, sheep soon "weigh like lead" when pastured on it. It is hardy in winter, resists severe droughts; in fact, of untold value, and its cultivation is just beginning. Sow 5 lbs. per acre broadcast; 3 lbs. per acre if drilled. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1. By frt. or ex., per lb. 12c, 100 lbs. \$10.00.

FIELD PEAS A crop of the greatest value for forage and hay. Not much grown yet, but will play a leading part in the farming of the future. Sown at same time as oats they quickly make an early green or dry feed. Cut for hay before the peas mature.

CANADA FIELD—Makes a great amount of feed relished by all kinds of stock. Sow 1 to 1½ bu. per acre. ½ bu. of oats per acre sowed with the peas is an advantage. If for hay, they cure easily. By mail, pkt. 5c, pt. 20c, qt. 30c. By freight or express, ½ bu. 50c, 1 bu. \$1.75, 5 bus. @ \$1.50.

THE WONDERFUL PEA—Truly a wonderful and most valuable variety in its great productiveness of vine and peas. Its value as a stock feed can not be over estimated. Grown with the greatest of ease on any kind of and peas. Its value as a stock feet can not be over estimated. Grown with the greatest of ease on any kind of soil, yet an acre of them is worth much more than an acre of corn for fattening hogs, besides enriching the soil more than a heavy crop of clover. They grow much larger and quieter than any other kind of peas. For hay they yield immensely and produce the crop in about 100 days from sowing. They can be sown from April to July. Of course the late sowing will not mature seed, but will abundantly repay the trouble in an enormous crop of vines. They are also a good pea for table use. Sow ½ to ¾ bu. per acre. By mail, pkt. 10c, pt. 25c, qt. 40c. By freight or express, ¼ bu. \$1.00, bu. \$3.00.

LATHYRUS SYLVESTRIS or FLAT PEA This wonderful plant we believe to be one of the most valuable additions to the fodder and fertilizer plants introduced in recent years, which will grow and thrive in poor sandy soils and drought-stricken districts, which but a few years ago were considered barren wastes. Analyses, of which a number have been made, show the hay to be exceedingly nutritious, containing nearly double the flesh-forming ingredients in clover hay, richer than the balanced rations generally used for fattening cattle, and rich enough to fatten either hogs or sheep without the addition of grain. Being thoroughly permanent, when once established it will last 50 YEARS, and yield enormous crops of hay. A tons per acre have been cut in the United States at one mowing and may be mowed 2 or 3 times in a summer. Sow in drills 2½ ft. apart by 4 to 6 in. apart and 8 in. deep. The seed is slow to germinate and plants grow slowly the first season, hence must be carefully cultivated and weeds kept down. By sowing a few turnip seed to mark the row, weeding can be done to better advantage. Roots go 10 feet into the soil. By mail, pkt. 10c, oz. 20c, ½ lb. 50c, lb. \$1.75.

VETCHES-VICIA VILLOSA-The Hairy Vetch. This is the most valuable of all the Vetches, It succeeds on all soils and does not suffer from extremes of drought, heat or cold. Sown in spring it quickly produces a most luxuriant crop. Sown in August or September it covers the ground with a dense mat of foliage, which affords pasture all winter when not covered with snow, and early pasture in the spring or a grand crop to turn under. They can be fed green, made into hay or ensilage. Where grass or clover has failed or land is too expensive to grow the ordinary crops of hay, it will pay to grow vetches. Sow 40 to 50 lbs. per acre. Bu. weighs 60 lbs. By mail, pkt. 10c, pt. 25c, qt. 40c. By frt. or ex., ½ bu. \$1.25, bu. \$4.50.

SOJA BEAN or COFFEE BERRY The plant grows erect, 4% ft. high, with numerous branches covered with heavy foliage. The branches and stem are thickly set with clusters of pods, 2 beans in a pod. The growth is very vigorous throughout the season. This seed has been sold under the name German Coffee Berry at extravagant prices. When roasted, ground and used as coffee it resembles the genuine article quite closely. When mixed half with coffee it is claimed by some to make a better drink than pure coffee. Its value to farmers is the ground beans, which make a very rich feed for milch cattle and also good for other stock; also valuable as a fertilizer. Sow ½ bu. per acre broadcast or in drills 3 ft. apart; 12 in. between plants. By mail, pkt. 10c, pt. 20c, qt. 35c. By freight or express, ½ bu. \$5c, bu. \$3.00.

BROMUS INERMIS A grass of enormous value, particularly for the dry sections of the West and South. It endures extremes of temperature and resists protracted drought, succeeding where Alfalfa fails. Poor lands are no discouragement. It grows best in light, sandy loam, but its roots will penetrate the stiffest clays. It is equally good for cutting green, pasturing or cutting into hay, and the dense tough sod it forms is most valuable for holding the banks of ditches and strengthening the turf of sandy soil. Dr. Sewell, of the U. S. Grass Experiment Station, Garden City, Kas., says it is equal to Timothy for cattle and horses, and makes as fine a pasture as Blue Grass. From the same station comes the report that this grass is positively the best out of over 600 kinds tested. In our country it has done equally well in Canada, Mississippi, Kansas, Colorado, Wyoming and California. Use 25 lbs. to the acre. It may be sown in the fall with winter wheat, or in the spring. Cut when first coming into bloom. By mail, pkt. 10e, lb. 40c. Rv freight, bu. of 14 lbs. \$3.40. By freight, bu. of 14 lbs. \$3.40.

TEOSINTE—(Reana Luxurians). This gigantic fodder plant from Central America somewhat resembles Indian Corn. It produces a great number of shoots, growing 12 ft. high, thickly covered with leaves, and yielding an abundance of forage. As a soiling or fodder plant in the South and South-West it surpasses either corn or sorghum, and in the extreme South is a perennial; suited also for growing in the middle latitude. When cut off will grow up again, and stools wonderfully. The leaves are long and broad and the stalks full of sweet sap. Plant same time as corn. 3 lbs. will plant an acre. Sow in drills 3½ to 4 ft. apart. By mail, pkt. 10c, oz. 20c, lb. \$1.50.

MILO MAIZE—Wellow. This is the earliest Milo Maize; of vigorous growth, and yields more grain. It makes an enormous quantity of fodder; yielding three cuttings a year from one sowing, and is relished by all kinds of stock. Is valuable for ensilage. Sow in spring at the rate of 6 lbs. per acre, in drills 3 ft. apart. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c, bu. \$2.50.

BLACK RICE CORN This novelty among the non-saccharine sorghums is a cross between Milo Maize and Jerusalem Corn, and combines the good points of the two. From the Jerusalem Corn it has the large yield of grain, and from the Milo Maize the best yield of fodder. It produces the most fodder and yields the most grain of all the different kinds of non-saccharine sorghum now being grown in the Western States. It grows 5 to 6ift. high, has a stocky stem with many side leaves. Some heads grow on a goose-neck stem and weigh from ½ to 1 lb. each. Seed is white, with black chaff. It will withstand drought as well as any of the other non-saccharine sorghums, and does not shell out as easily in the field as the others do. The yield of seed and fodder will fully equal corn under favorable conditions and will make a crop when corn fails. It is superior to Kaffir Corn for all purposes for which that plant and grain are used, and withstands drought equal to it. By mail, pkt. 10c, 1b. 25c, 4 lbs. 75c. By freight or express, per lb. 10c.

#### CLOVER SEED.

Price Liable to vary.

Bags, extra for each 21; bushels or less, 15c each. 4 lbs. or less, prepaid on roal. Larger quantare by freight or sepress, at a cost of parchase.

# First Premium White Dent CO ALWAYS A PREMIUM .

UR artist has tried to faithfully portray the beauty of this grand variety and to a great extent has succeeded. The large ear is a fair representation of an ear 11 inches long reduced in size. The inches as platted are of actual length, hence the ear is only of a stual length. The hill of corn will show style of growth, and with the picture of Mr. Trout, the originator, who is a good sized man, to serve as a basis for comparison, a very clear idea can be had of this corn as it grows in the field. Mr. Trout is the champion corn-grower of his county, and has been regularly excelling all his wide-awake neighbors in his corn product. We name it First Premium because of the fact that it has been awarded highest honors wherever exhibited. It is a pure ivory white corn on a white cob. Ears grow longer and not so thick as our Forsyth Favorite and grains do not average quite so long. The grains are of fine texture, smooth, compact, sound and heavy. Its purity in color adapts it for making White Meal and other corn products. Matures in 100 to 110 days, is finely adapted to all sections south of a line 75 miles north of Indianapolis, and will give all growers great satisfaction in quality and productiveness. This corn has taken the country by storm. We sell enormous quantities of, it as regularly as the season comes around. Below are only a few reports, samples of hundreds received.

low are only a few reports, samples of hundreds received. "I recommend F. P. W. D. Corn to all farmers as one of the best varieties of white corn in this state. S. N. CLEMENS, Grant Co., Ind."

"In the lead of all white corn in my county.

#### The Deepest Grained and Most Productive White Dent Corn.

# FORSYTH'S FAVORITE.

This corn was originated in Johnson Co., Ind., in that section known as the Garden Spot of this great Corn State, and in the few years since its distinct characteristics have been brought out it has made both a local and national reputation. It is conceded to be the largest eved and deepest grained early white corn ever seen in this market. All who see it proclaim it a king in the great corn family.

In describing this corn we must speak of the size of the ears as mammoth, being 8 to 15 inches long, with grains averaging about half inch long, and sometimes contain grains ½ inch in length. The number of rows on a cob range from 16 to 24: ears containing 1,500 to 2,000 grains are quite common. Grains pure white, cob white and usually hollow at butt end, which allows the ear to dry out quickly, and enables the grower to crib his corn before smaller varieties are fit. We recommend it for this latitude and all points South, and it can be grown 100 miles North by selecting ground that will admit of early planting. The following well-known farmers of Johnson County attest to the graind properties of this corn, and say it can be cribbed ahead of any of their common field corn, and also that it yields enormously: M. V. Kindle, D. M. Forsyth, W. S. Core, J. S. Mountz, J. T. Walker, A. V. Pendleton, Geo. H. Pendleton, Edward Alexander, etc., etc.

As we were writing this page of our catalogue, our grower, Dr. Forsyth, came in with 12 ears of this famous corn weighing 20 pounds. This corn was shown to many people, including the members of the Marion County Horticultural Society, which is in session to-day, and they are unanimous in saying that they never saw such great corn before.

We have sold this corn four seasons, with the most gratifying results. It has become a great favorite. Our crop this year is exceptionally fine, and bound to please

come a great favorite. Our crop this year is exceptionally fine, and bound to please the most exacting.

We have space for only a few reports; could fill half this catalogue, if space permitted:

I am very much pleased with the Forsyth Favorite Corn. It is the largest corn I ever growed, and withal, is as early as my smaller eared varieties. It is a great money-making corn.

ABRAHAM DOWNLY, Lancaster Co., Pa.

As is usual with your seeds, I found the Forsyth Favorite Corn sustained the high recommendation you gave it. I am sure my trial plot yielded 150 bushels per acre of the finest corn I ever saw. DAVID ELDRIDGE, Cuyahogo Co., O.

For the Forsyth Favorite White Dent Corn, I must say, wiithout boasting, that it is by far the finest I ever raised in my farming experience of 12 years, and I have planted nearly every kind I will plant no other in the future.

J. R. Byers, Ohio Co., Ky. Forsyth Favorite White Dent is the largest, heaviest and best corn I ever saw. On a test 52

ears weighed 701/4 lbs.; the cob weighed 111/4 lbs. John Waggoner, Lincoln Co., Ky. 30 acres of Forsyth Favorite Corn yielded 2,730 bushels of as fine corn as ever grew. The like was never seen before in all this section.

C. F. Penderton, Hardin Co., Iowa.

PRICE By mail, post paid: 1 ear weighing 1 to 134 lb. and containing 1,000 to 2,000 grains, which will raise about 20

bushels of corn, 30c; 4 such ears for \$1.00. Those who order first will get the largest ears. 1 lb. shelled 25c, 4 lbs. 75c. By freight or express, 1/2 bu. 60c, bu. \$1.75, 1 bag 21/2 bu. \$4.00, 5 bus. or more @ \$1.25.

The price of this seed will not deter any farmer, who wants to be abreast of the times, from getting a start at once.

Our varieties of Seed Corn are also adapted to the South. Yes, of exceptional value. They are large and yieldy, and, as a rule, give better results than the native sorts. We particularly recommend our two white varieties and White Cap Yellow Dent for that sec-

tion.

J.A.EVERITT.SEEDSMAN.

garry Gray and the other in a bag of any other oats.
The Calgarry will feel soft and velvots. garry Gray and the other in a bag of any other oats. The Calgarry will feel soft and velvety, while the other will feel harsh and woody. Again, grasp a handful tightly, withdraw your hands from the sacks, open them, and the Calgarry will slip from your hand like an eel, while the other will have penetrated the skin of the hand so as to hold many of the oats. All these good qualities, combined with a larger percentage of kernels to berry than any other, makes absolutely the best feeding oats in cultivation. The Calgarry Gray Oats grow very dwarf, even on strong ground: seldom exceeding 3 feet in length, while 2½ feet is about the average length. This is a great point for those farmers who have rich ground. Nothing short of a moderate cyclone will put them down. They ripen the earliest of all. These oats can be put in shock before Welcome Bonanza, White Russian, etc., turn yellow. This quality of itself is sufficient recommendation to place them ahead of any other variety, as by their early maturity ahead of any other variety, as by their early maturity they escape the hot sun, dry weather, storms and rust that prevail about the time ordinary oats mature. In the important matter of productiveness they have outyielded all other sorts where placed in competition in experiments and in ordinary field culture.

The retreatment and the productive of the Ultimis Acriguity and

The extracts from reports of the Illinois Agricultural Experiment Station, given below, will be very interesting and speak volumes:

#### Extracts from Illinois Experiment Station Reports.

Yield, per acre, Calgarry Gray, 54.5 bushels. Ripe, uly 25. Fer cent, of kernel in berry, 77.43.

In the experiments, the above variety led in the particular points mentioned; the number of varieties

tested was 59. The average yield was 39.8. The average per cent. of kernel to berry was 69.57.

I think the Calgarry Gray Oats are superior to any other oats I ever raised. They excel in yield other kinds 10 to 15 bushels per acre. Extra early and my crop weighs 42 pounds per bushel, struck measure. They stand up best and mature plump and heavy under the hottest sun, where other oats are builded. S. J. BARRETT, Ford Co., Ill.

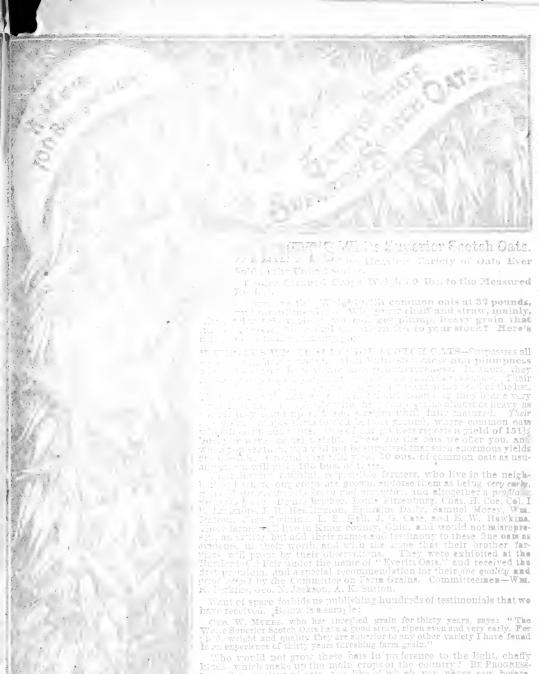

The fame of the Calgarry Oats having spread to my neighborhood, I took pains to test them, and I am happy to be able to say that the results have more than equaled the recommendation given them. They mature earlier and excel in productiveness and quality any kind that I have heretofore grown.

P. Travis, Barry Co., Mich.

I take great pleasure in testifying to the merits of the Calgarry Gray Oats. I find them to be free from rust, of great weight of grain, straw very strong and are a long ways the best feeding oats I have ever known. Extremely early; in fact, the earliest oats I ever grew.

FRANK L. SKINNEÉ, Ford Co., Ill.

What excuse can any farmer have for not sowing some of these oats this season? Look at the price. We never sold choice seed as cheaply before as we do this year. If we don't get a great big trade we will be left, too, as expenses are heavy, even after we cut them down to the last notch. We believe the farmers will rally to the support of O.K. Seeds this year as ever before. By mail, 1 lb. 20c, 4 lbs. 65c. By frt. or ex., 1/4 bu. 35c, 1 bu. \$1.00; 3 bu. for 2 acres, \$2.25; more than 3 bus. at the ozoh

coler Changa Crays Weigh 10 lbs. to the Measured

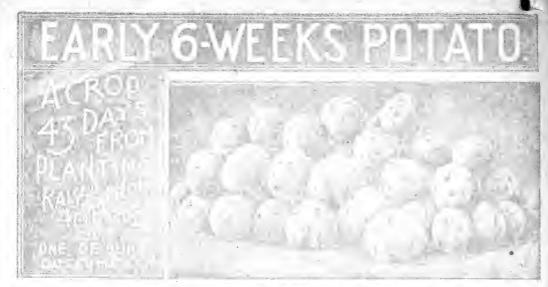

res fa'. Wright with common oats at 22 pounds, whimeviers. Why grow thud and straw, mainly, a turies; for one get plump, heavy grain that the se and the whom led to your stock? Here's

Who would not grow these dats in preference to the light, chaffy Einds, which make up the main crops of the country? Be Progressian, Get a variety of dats, the like of which you never saw before, which courain so much vigor that they will produce a crop regardless of the season. The price is low enough that you can sow a field or your entire crop. Sow largely of these dats for profit.

MAGE OF EVERITT'S White Superior Scotch Oats. Remember The these oats weigh nearly double common oats to the measured bushel. We give the standard weight, 32 lbs., for a bushel. By mail, post paid, 1 1b. 20c, 4 lbs. 65c. By freight or express, 1/4 bu. 35c, 1 bu. \$1.00. 3 bus. (1 bag), for 2 acres \$2.50, 6 bus. (2 bags), or more, at 75c

You can well afford to pay our price for these oats for seed, and you cannot buy improved varieties of seed as cheaply of any other seed nouse. We have never before sold seeds so cheaply. This is the year to change your seed.

We named and introduced the White Superior Scotch Octs
and can furnish the genuine article. Another house claims
they furnished the seed of this variety that was given an award at the World's
Fair. Ask them for official evidence. Come into our house and see the don-We furnished the seed and have the award.

same farm were respectively 420 bushels per acre; 380 bushels per acre same farm were respectively 420 bushels per acre; 380 bushels per acre and 600 bushels per acre. The originator says about this potato:

"Potatoes have been my favorite crop since I was a boy and I always took great pleasure in seeing what good crops and large yields I could get, but never did isee a nicer potato than this. Fhave raised a great many kinds, sent for the earliest in the catalogues, and have raised them from seed, and got some very good ones, but none that came up to my ideal of a perfect potato until I originated this. I have now discarded all others, and raise this for early and main crop, for market and home use. I am fully convinced that I have at last produced the best early potato in cultivation. It combines more good qualities than any other variety in the world.

the world.

Grown on a light gray soil, and without manure or fertilizer, they yielded at the rate of 380 bushels per acre, which can be increased by potato manure, and is

the rate of 380 bushels per acre, which can be increased by potato manure, and is excelled on rich soil.

In a careful comparitive test with three other varieties, each of which have been claimed to be the earliest, the following results were obtained: All were planted May 2. Eventt's Six-Weeks Market matured in 72 days; yield, 120 bus, per acre. Stray Beauty matured in 87 days; yield, 189 bus, per acre. Downing matured in 92 days; yield, 350 bus, per acre; Early Sunrise matured in 100 days; yield, 378 bus, per acre. This test shows this new potato to be 15 days earlier than any of the above and far more productive.

TESTIMONIALS

We wish we had space to publish one-fourth the testimonials received type as samples of many, and will send many more to any person on request. EARLY SIX-WEEKS IS THE EARLIEST.

The photo-engraving on page 58 was made direct from potatoes sent us by John L. Saum, of Paulding Co., O., who writes as follows:

I send you to-day by freight the product of 40 hills of Six-Weeks Potatoes. They were dug last night and this morning and grew in 43 days. They were grown from one-eye seed. I have just began farming on my own laud, and am not fixed yet for pushing a crop of early potatoes. These were covered with a breaking plow and given very ordinary treatment. Think I can beat it next season. Several people who saw them were astonished. I expect to exhibit at our county fair.

John L. Saum.

I like the Six-Weeks Potatoes very much. I divided with my neighbors. One of them says they are the best he ever saw. They are excellent keepers. They are first-class in every respect.

E. Hartman. Sutton Co., W. Va.

The Early Six-Weeks Potatoes did well with me. I could sell a car load for seed eff I had them. John B. Cochran, Jeff. Co., O. here if I had them

In 75 days, and produced marketable potatoes in Six-Weeks, as you claimed. This is the most valuable variety of potatoes ever introduced. R. Taylor Ashland, Co., Wis.

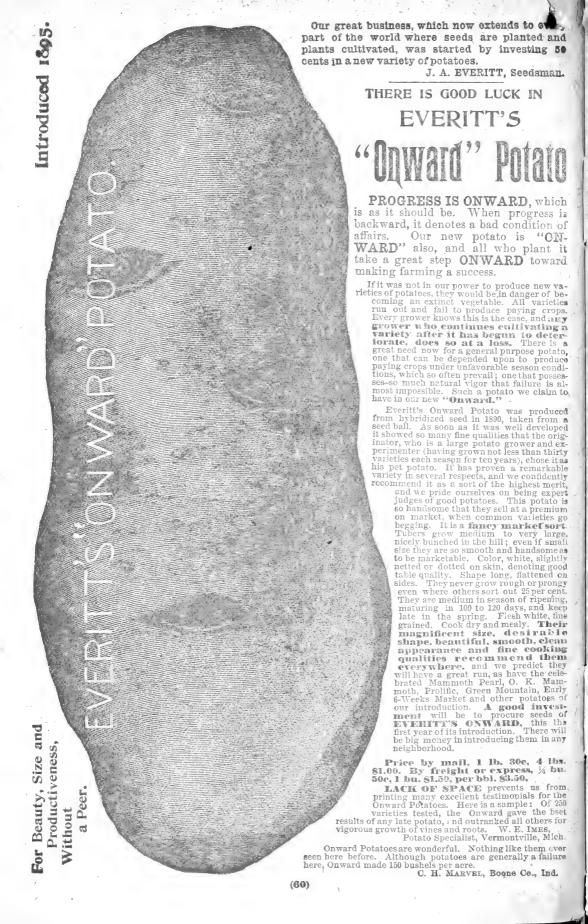

You have got it this time—I mean the best early and the earliest potato in existence. We had the Early Six-Weeks Market in existence, we wan the reary Six-Weeks Market Potato large enough for the table in six-weeks from planting. They out-yielded all our other varieties. August Rooknes (Gardener), Allegan Co., Mich.

# Everitt's "Perfection" Broad-Cast Seed S

For Sowing Wheat, Oats, Rye, Rice, Flax, Grass Seed, Clover Seed, etc. any kind of Seed Broad-Cast. In fact

No careful, economical farmer will continue to sow his seed by hand (the old style) when he can get one of these machines at our reduced prices. They will save their cost almost daily in saving of seed, to say nothing about saving of time and more even distribution, which will have a great effect with the continue of the save and the continue of th on the crop.

They will Sow from 4 to 8 Acres per Hour at a Common Walking Gait. The Crank

These machines when first invented sold for \$15.00 each. Valuable labor-saving, seed-saving, crop increasing machines. The seed is not thrown upward, but distributed right and left evenly, and will save at least one-third the seed used in hand-sowing. They are operated by a transverse motion of the bow, or a crank which revolves the distributor and works the vibrator rapidly. It is the only seed sower having a satisfactory vibrator which prevents the seed from clogging. They are quickly adjusted to sow any quantity desired. The grain sack holds one bushel, made strong, well finished and weighs about four pounds. It will last many years. At a round will sow wheat 50 feet, buckwheat 48 feet, flax seed 36 feet, grass seeds from

MAN-POWER WORK IS DONE ALMOST WITHOUT WORK.

Patented in the United States, Canada, Great Britain, France, Germany, Austria and Belgium.

Will Revolutionize Hand-Power Cultivation and Makes Keeping a Horse an Unnecessary Expense in Many Cases.

MODERN scientists and inventors are devoting their time and energies to the problems of utilizing waste. There are fewer new things "under the sun" than many people imagine, but the manners of utilizing There are fewer new things "under the sun" than many people imagine, but the manners of utilizing them are what causes us to hold up our hands in astonishment. Steam is as old as the earth, yet the steam engine which utilizes what was wasted for thousands of years is of very modern construction. Who wild doubt the existence of electricity since the foundations of the world were laid? The wind which cooled the brows of Adam and Eve in Paradise, and has ever been present, restless and unchanged, has been har nessed and now does the will of man. There is sufficient force ungonsciously going to waste in our cities and towns every day to drive every manufactory needing power. Every man, woman and child, whether in city or country, is continually exerting a force equal to the weight of the body, whether lying down sitting, standing or walking. This force, equal to millions of pounds, has been going to waste in all time past, and from the condition of things, must continue to be wasted, to a great extent, for all time to come. But why not utilize it to as great an extent as possible? If this force, which every person must exert, can be utilized by the agricultural classes to the saving of muscular exertion, will it not be a great boon? And will not he who perfects an appliance that allows the man, as he walks across his field, to take part of his weight (force) off of the ground and use it for planting or cultivating his trops, to the saving of muscular exertion, be a public benefactor? We are now ready

call attention to Everitt's Celebrated Man-Weight arm and Garden Tools.

These great machines were invented and patented by J. A. EVERITT, in 1891, and greatly improved since. The great advantage of this invention can be partly understood by studyfully realize their great advantage, until he uses the machines. They are a great boon to all cultivators of the soil, and must be classed with the great inventions of the age, yet they are so simple that the natural question with every one is: "Why did I not think of that?" So nicely do they fill a want existing with thousands that?" So nicely do they fill a want existing with thousands of gardeners, nurserymen, seedsmen, florists and farmers, that after the first trial they invariably conclude to "never do without them." The **Man-Weight Cultivators** are worth their weight in silver, if not in gold, to any one who cultivates the soil. All who have used the machines unanimously endorse them in the strongest language. We have heard sensible, shrewd gardeners remark: "I would not sell them for \$25.00." "\$100.00 would not tempt me to do without them one season," etc. The first gardener who saw the mathem one season," etc. The first gardener who saw the machine at Indianapolis, gave his order for the first one we could make. Other gardeners at once acknowledged that it is just what they want, and many remarked that "If all gardeners knew of these machines they could not be made fast enough to supply the demand." A trial by any person will demonstrate the wonderful utility of

the wonderful utility of these machines. Any per-son possessing them will make it impossible for his neighbors to compete with him in raising crops.

There are several features on the Man-Weight Tools which are novel and make a tool vastly superior to any other man-power or horse machines:

We mention the push bar. In operation, ward, thus taking part of ward, thus taking part of the weight of the body off of the ground and directing it against the machine. In this way the machine is propelled by the weight of the body, without any muscular ex ertion whatever. Your weight does the work. Without this machine all your weight is wasted on the ground.

2. By means of the push-bar we propel and guide the machine, hence the drag-bars can be hinged, and are adjusta-ble in all directions; thus the tools attached to the drag-bars perform the work just as a weeder would in your hands. It is the only cultivator made that does complete work at one operation. No after-hoeing is required. (See illustrations on this page.)

3. As is evident, the ower obtained, the power obtained, the amount of work that can done and the quality

of the work are far in excess of any other hand tech, nearly equaling horse power in quantity, while the quality of the work is far superior to horse power work.

4. In an orchard where a horse can not be taken, and anywhere where the w rk is too heavy for other hand machines, these fill the bill to perfection. By one man pulling ahead, sod or compact ground can be broken up.

5. Double the amount can be raised on a given piece of ground than with a horse plow. This is accomplished by closer planting and frequent cultivation.

6. Many gardeners and small farmers can save the ex-

ease of keeping a horse.

7. Plants can be cultivated rapidly and often, hence mature earlier, with a greater yield. In this way the machine can be made to pay for themselves several times every year.

J. A. EVERITT—Dear Sir—My experience with the Man-Weight Machines teaches me that no trucker will let it go off his farm after a fair trial. The South is your best field, since you have the only wheel hoe that the average darkey can use with profit to the grower. W. A. PARKER, Weston, Miss.

The **Combined Man-Weight** I bought last spring is as far ahead of other wheel hoes used here as the self-binder is of the sickle. They fail to even imitate its work.

SAM. L. EDWARDS, Revere, O.

#### Referring to the Illustrations on Next Page:

View No. 1 shows the Man-Weight breaking up the ground. It is not intended to break up very hard ground, although if a man or a boy pulls ahead, almost any work in this line can be done. To loosen up ground that has become compact, it is just the thing.

View No. 2 pulverizes the ground after it is broken up, and

View No. 3 makes furrows to receive seeds, potatoes, etc., and covers the seed.

View No. 4 covers seed in rows, or banks up earth on both sides of the plants,

View No. 12 is an onion harvester, and the best one made The adjustability of our drag bars, moving sidewise or up and

The adjustability of our arg bars, moving staewise or up and down, makes the work lighter and the tool more effective.

View No. 5 is the drill, improved for 1896. It plants all kinds of seeds, in hills or drills, as desired, covers and marks out the next row. Small farmers need not buy an expensive corn drill. This will do the work as well, and the cultivators

corn arul. This will do the work as well, and the cultivators will take care of the crop as it groves, thus doing away with much machinery, also saving the expense of keeping a horse. Views 6, 7, 8, 9, 10, 11 are adapted to almost all kinds of cultivation and weeding. When you know what you want to do, you can construct the machines to accomplish the desired

I would not take \$100 for my Man-Weight if I could not get another

for less.
F. R. WIEDENMILLER, Riverside, Cal.

The Man-Weight came duly to hand and works splendidly.

D. M. McIntosh, Charleston, S. C.

Your Man-Weight is the greatest and best tool for cultivating the ground that I ever saw.
S. V. VEST,

Houston, Minn.

With the Man-Weight outfit I can do more work in an hour than a good hand can do in a with a hoe, and I am 76 years old.
T. W. HAMMOND

Ottumwa, Ill.

I have been using the and push cultivators but the Man-Weight is far ahead of them. H. A. SIMMONS, P.M.

Clinton, Mich. Truly superior in its class and a curiosity in my neighborhood.

F. M. MYERS, West Sa em, O.

My customer, for whom I ordered the combined **Man-Weight**, is more than pleased with it. I have given him all the time he wanted to test it.

ELMER V. WALKER, Oxford, Me.

Better than I expected. One of the grandest garden too's ever invented. Fifty dollars would not buy mine if I could not get another. JACOB BRICKER, Muncie, Ind.

Works like a charm. The man using it says he would not without one. Simon Seyert, Gibralter, Pa. be without one.

A thousand more testimonials would be printed if space permitted. Send for complete Catalogue of Man-Weight Tools.

PRICE The Man-Weight can not be sold as cheaply as some old style machines. They are made on the same plan as the large two horse cultivators. Yet when the quantity and quality of work they will do is considered, as well as the ease of doing it, they would be cheap at twice the price we ask.

Single Wheel Machine, with 5 sets of tools.....\$6.00 Combined Single and Double, 5 sets of tools... 8.00 Combined Single and Double, and Drill No. 5, 12.00 Plain Drill. No Cultivating Attachments...... 8.00

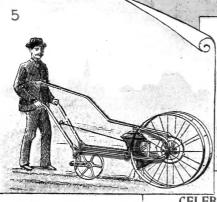

Everitt's Man-Weight Machines, although invented and patented in 1891, are already sold all over the world where seeds are sown and plants grown.

Ask your dealer for Everitt's Man-Weight. If he does not keep them and will not get them, send direct to us. Don't be influenced to take any of the old style machines. Life is too short, time too valuable, and competition too great to waste vour energies with them your energies with them.

NOTICE THE DIFFERENCE IN WORK DONE BY A MAN-WEIGHT MACHINE AND THE OLD STYLE. IN THE FIRST CASE THE WORK IS COMPLETE; IN THE SEC-OND IT IS ONLY HALF DONE.
